

*The Commonwealth of Massachusetts*  
*Department of Public Utilities*  
*Mark D. Marini, Department Secretary*  
*One South Station*  
*Boston, MA 02110*

TO THE MAYORS, SELECTMEN, MUNICIPAL LIGHTS BOARDS AND MANAGERS OF MUNICIPAL LIGHTING IN THE SEVERAL CITIES AND TOWNS IN THIS COMMONWEALTH OPERATING GAS OR ELECTRIC LIGHT PLANTS:

This form of the Annual Return should be filled out and one original and a duplicate copy (which may be a photocopy) should be returned to the Office of the Department of Public Utilities, One South Station, Boston, Massachusetts 02110, by March 31st of the year following the calendar year of the report in accordance with the statutes of the Commonwealth and the regulations of the Department made in pursuance thereof.

Where the word "None" truly and completely states the fact, it should be given as the answer to any particular inquiry or portion of an inquiry.

If respondent so desires, cents may be omitted in the balance sheet, income however, shall agree with even-dollar amounts in the main schedules. Averages and extracted figures, where cents are important, must show cents for reasons which are apparent.

Special attention is called to the legislation in regard to the Returns placed in the last page.

**GENERAL INFORMATION**

1. Name of town (or city) making this report.	Holyoke, Massachusetts 01040
2. If the town (or city) has acquired a plant, Kind of plant, whether gas or electric. Owner from whom purchased, if so acquired. Date of votes to acquire a plant in accordance with the provisions of chapter 164 of the General Laws. Record of votes: First vote Yes, ; No,      Second vote: Yes, ; No, Date when town (or city) began to sell electricity,	1902
3. Name and address of manager of municipal lighting:	James M. Lavelle 54 Pleasant Street Holyoke, MA 01040
4. Name and address of mayor or selectmen:	Joshua A. Garcia City Hall Holyoke, MA 01040
5. Name and address of town (or city) treasurer:	Rory Casey City Hall Holyoke, MA 01040
6. Name and address of town (or city) clerk:	Brenna Murphy-McGee City Hall Holyoke, MA 01040
7. Names and addresses of members of municipal light board:	Francis J. Hoey, III 15 Carol Lane Holyoke, MA 01040  Marcos Marerro 34 Pinehurst Road Holyoke, MA 01040  James A. Sutter 30 Fairfield Avenue Holyoke, MA 01040
8. Total valuation of estates in town (or city) according to last state valuation Fiscal 2023 7/1/22 - 6/30/23 \$2,538,396,005	Fiscal 2024 7/1/23 - 6/30/24  \$2,651,077,152
9. Tax rate for all purposes during the year: Fiscal 2023 7/1/22 - 6/30/23 \$18.76 - Residential \$40.17 - Commercial/Industrial	Fiscal 2024 7/1/23 - 6/30/24  \$18.95 - Residential \$40.26 - Commercial/Industrial
10. Amount of manager's salary:	\$258,161.00
11. Amount of manager's bond:	\$100,000.00
12. Amount of salary paid to members of municipal light board (each)	\$4,000.00

FURNISH SCHEDULE OF ESTIMATES REQUIRED BY GENERAL LAWS, CHAPTER 164, SECTION 57 FOR GAS AND ELECTRIC LIGHT PLANTS FOR THE FISCAL YEAR ENDING DECEMBER 31, NEXT

INCOME FROM PRIVATE CONSUMERS:		
1	From Sales of Gas.....	25,760,186
2	From Sales of Electricity.....	53,555,452
3	From Sales of Steam and Sundries.....	3,736,605
4	TOTAL	<b>83,052,243</b>
EXPENSES:		
6	For operation, maintenance and repairs.....	73,644,851
7	For interest on bonds, notes or scrip.....	1,741,052
8	For depreciation fund ( 3% on \$299,644,256 as per page 8B & 9A ).....	<b>8,989,328</b>
9	For sinking fund requirements.....	
10	For note payments.....	
11	For bond payments.....	6,747,139
12	For loss in preceding year.....	
13	TOTAL	<b>91,122,369</b>
COST:		
16	Of gas to be used for municipal buildings.....	959,091
17	Of gas to be used for street lights.....	
18	Of electricity to be used for municipal buildings (includes telecom).....	3,297,012
19	Of electricity to be used for street lights.....	381,288
20	Of steam.....	
21	Total of the above items to be included in the tax levy.....	<b>4,637,391</b>
22	New construction to be included in the tax levy.....	
23	Total amounts to be included in the tax levy.....	<b>4,637,391</b>

## UTILITY PLANT - GAS

1. Report below the items of utility plant in service according to prescribed accounts
2. Do not include as adjustments, corrections of additions and retirements for the current or the preceding year. Such items should be included in column (c).
3. Credit adjustments of plant accounts should be enclosed in parentheses to indicate the negative effect of such amounts.
4. Reclassifications or transfers within utility plant accounts should be shown in column (f).

## ELECTRIC OPERATING REVENUES (Account 400)

1. Report below the amount of Operating Revenue for the year for each prescribed account and the amount of increase or decrease over the preceding year.
2. If increases and decreases are not derived from previously reported figures explain any inconsistencies.
3. Number of customers should be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings

are added for billing purposes, one customer shall be counted for each group of meters so added. The average number of customers means the average of the 12 figures at the close of each month. If the customer count in the residential service classification includes customers counted more than once because of special services, such as water, heating, etc., indicate in a footnote the number of such duplicate customers included in the classification.

4. Unmetered sales should be included below. The details of such sales should be given in a footnote.
5. Classification of Commercial and Industrial Sales, Account 442, according to Small (or Commercial) and Large (or Industrial) may be according to the basis of classification regularly used by the respondent if such basis of classification is not greater than 1000 Kw of demand. See Account 442 of the Uniform System of Accounts. Explain basis of classification.

26	Total number of employees of electric department at end of year including administrative, operating, maintenance and other employees (including part time employees)	91.0

GAS OPERATING REVENUES (Account 400)

1. Report below the amount of Operating Revenue for the year for each prescribed account and the amount of increase or decrease over the preceding year.
2. If increases and decreases are not derived from previously reported figures explain any inconsistencies.
3. Number of customers should be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing purposes, one customer shall be counted for each group of meters so added. The average number of customers means the average of the 12 figures at the close of each month. If the customer count in the residential service classification includes customers counted more than once because of special services, such as water, heating, etc., indicate in a footnote the number of such duplicate customers included in the classification.
4. Unmetered sales should be included below. The details of such sales should be given in a footnote.
5. Classification of Commercial and Industrial Sales, Account 481, according to Small (or Commercial) and Large (or Industrial) may be according to the basis of classification regularly used by the respondent.

SALES FOR RESALE (Account 447)

1. Report sales during year to other electric utilities and to cities or other public authorities for distribution to ultimate consumers. and place an "x" in column (c) if sale involves export across a state line.
2. Provide subheadings and classify sales as to (1) Associated Utilities, (2) Nonassociated Utilities, (3) Municipalities, (4) R.E.A. Cooperatives, and (5) Other Public Authorities. For each sale designate statistical classification in column (b), thus: firm power, FP; dump or surplus power, DP; other G,
3. Report separately firm, dump, and other power sold to the same utility. Describe the nature of any sales classified as other power, column (b).
4. If delivery is made at a substation indicate ownership in column (e), thus: respondent owned or leased, RS; customer owned or leased, CS.

Line No.	Sales to (a)	Statistical Classification (b)	Export Across State Line (c)	Point of Delivery (d)	Sub Station (e)	Kw or Kva of Demand (Specify which)

SALES FOR RESALE (Account 447) - Continued

5. If a fixed number of kilowatts of maximum demand is specified in the power contract as a basis of billings to the customer this number should be shown in column (f). The number of kilowatts of maximum demand to be shown in column (g) and (h) should be actual based on monthly readings and should be furnished whether or not used in the determination of demand charges. Show in column (i) type of demand reading (instantaneous, 15, 30, or 60 minutes integrated).

6. The number of Kilowatt-hours sold should be the quantities shown by the bills rendered to the purchasers.  
 7. Explain any amounts entered in column (n) such as fuel or other adjustments.  
 8. If a contract covers several points of delivery and small amounts of electric energy are delivered at each point, such sale may be grouped.

## INTERCHANGE POWER (Included in Account 555)

1. Report below the Kilowatt-hours received and delivered during the year and the net charge or credit under interchange power agreements.
2. Provide subheadings and classify interchanges as to (1) Associated Utilities, (2) Nonassociated Utilities, (3) Associated Nonutilities, (4) Other Nonutilities, (5) Municipalities, (6) R.E.A., Cooperatives, and (7) Other Public Authorities. For each interchange across a state line place an "X" in column (b).
3. Particulars of settlements for interchange power
- shall be furnished in Part B. Details of Settlement for Interchange Power. If settlement for any transaction also includes credit or debit amounts other than for increment generation expenses, show such other component amounts separately, in addition to debit or credit for increment generation expenses, and give a brief explanation of the factors and principles under which such other component amounts were determined. If such settlement represents the net of debits and credits under an interconnection, power pooling, coordination, or other such arrangement, submit a copy of the annual summary of transactions and billings among the parties to the agreement. If the amount of settlement reported in this schedule for any transaction does not represent all of the charges and credits covered by the agreement, furnish in a footnote a description of the other debits and credits and state the amounts and accounts in which such other amounts are included for the year.

**MONTHLY PEAKS AND OUTPUT**

- Report hereunder the information called for pertaining to simultaneous peaks established monthly (in kilowatts) and monthly output (in kilowatt-hours) for the combined sources of electric energy of respondent.
- Monthly peak col. (b) should be respondent's maximum Kw load as measured by the sum of its coincidental net generation and purchases plus or minus net interchange, minus temp. deliveries (not interchange) of emergency power to another system. Monthly peak including such emergency deliveries should be shown in a footnote with a brief explanation as to the nature of the emergency.
- State type of monthly peak reading (instantaneous 15, 30, or 60 minutes integrated.)
- Monthly output should be the sum of respondent's net generation and purchases plus or minus net interchange and plus or minus net transmission or wheeling. Total for the year should agree with line 15 above.
- If the respondent has two or more power systems not physically connected, the information called for below should be furnished for each system.

Line No.	Month (a)	MONTHLY PEAK					Monthly Output (kwh) (See Inst 4) (g)	
		Kilowatts (b)	Day of Week (c)	Day of Month (d)	Hour (e)	Type of Reading (f)

41	TOTAL							347,851,328

## GENERATING STATION STATISTICS (Large Stations)

(Except Nuclear, See Instruction 10)

1. Large stations for the purpose of this schedule are steam and hydro stations of 2,500 Kw\* or more of installed capacity and other stations of 500 Kw\* or more of installed capacity (name plate ratings). (\*10,000 Kw and 2,500 Kw, respectively, if annual electric operating revenues of respondent are \$25,000,000 or more.)
2. If any plant is leased, operated under a license from the Federal Power Commission, or operated as a joint facility, indicate such facts by the use of asterisks and footnotes.
3. Specify if total plant capacity is reported in kva instead of kilowatts as called for on line 5.
4. If peak demand for 60 minutes is not available, give that which is available, specifying period.
5. If a group of employees attends more than one generating station, report on line 11 the approximate average number of employees assignable to each station.
6. If gas is used and purchased on a term basis, the B.t.u. content of the gas should be given and the quantity of fuel consumed converted to M cu. ft.
7. Quantities of fuel consumed and the average cost per unit of fuel consumed should be consistent with charges to expense accounts 301 and

GENERATING STATION STATISTICS (Large Stations) -- Continued  
(Except Nuclear, See Instruction 10)

547 as shown on Line 24.

- 8. The items under cost of plant and production expenses represents accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production expenses, however, do not include Purchased Power, System Control and Load Dispatching, and Other Expenses.
- 9. If any plant is equipped with combinations of steam, hydro, internal combustion engine or gas turbine equipment, each should be reported as a separate plant. However, if a gas turbine unit functions in a combined

operation with a conventional steam unit, the gas turbine should be included with the steam station.

- 10. If the respondent operates a nuclear power generating station submit: (a) a brief explanatory statement concerning accounting for the cost of power generated including any attribution of excess costs to research and development expenses; (b) a brief explanation of the fuel accounting specifying the accounting methods and types of cost units used with respect to the various components of the fuel cost, and (c) such additional information as may be informative concerning the type of plant, kind of fuel used, and other physical and operating characteristics of the plant.

STEAM GENERATING STATIONS

1. Report the information called for concerning generating stations and equipment at the end of year.
2. Exclude from this schedule, plant, the book cost of which is included in Account 121, Nonutility Property.
3. Designate any generating station or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give the name of

lessor, date and term of lease, and annual rent. For any generating station, other than a leased station or portion thereof for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars as to such matters as percent ownership by respondent, name of co-owner, basis of sharing output,

## GENERATING STATION STATISTICS (Small Stations)

1. Small generating stations, for the purpose of this schedule, are steam and hydro stations of less than 2,500 KW\* and other stations of less than 500 KW\* installed capacity (name plate ratings). (\*10,000 KW and 2,500 KW, respectively, if annual electric operating revenues of respondent are \$25,000,000 or more)
2. Designate any plant leased from others, operated under a license from the Federal Power Commission, or operated as a joint facility, and give a concise statement of the facts in a footnote.
3. List plants appropriately under subheadings for steam, hydro, nuclear internal combustion engine and gas turbine stations. For nuclear, see instruction 10 page 59.
4. Specify if total plant capacity is reported in kva instead of kilowatts.
5. If peak demand for 60 minutes is not available, give that which is available, specifying period.
6. If any plant is equipped with combustions of steam, hydro, internal combustion engine or gas turbine equipment, each should be reported as a separate plant. However, if the exhaust heat from the gas turbine is utilized in a steam turbine regenerative feed water cycle, report as one plant.

Line No.	Name of Plant (a)	Year Const. (b)	Installed Capacity Name Plate Rating - KW (c)	Peak Demand KW (60 Min.) ## SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve but one industrial or street railway customer should not be listed hereunder.
3. Substations with capacities of less than 5000 kva, except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended.
5. Show in columns (i), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership; by the respondent.
- For any substation or equipment operated under lease give name of lessor, date and period of lease and annual rent  
For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party explain basis of sharing expenses of other accounting between the parties and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company

**INTERRUPTIBLE  
GAS SERVICE SCHEDULE – G2 (No. 2 Fuel Oil)**

**AVAILABILITY**

Interruptible gas service is available under this schedule for to Commercial and Industrial customers using No. 2 fuel oil who are located adjacent to the Department's existing distribution mains, which mains have adequate capacity so that gas delivered hereunder will not impair service to other customers.

Gas supplied hereunder shall be separately metered and used only in such equipment as approved by the Department. In no case shall the gas be used interchangeably with that supplied under any other rate schedule of the Department. Reference is made to the "dual-fuel" provisions contained herein.

**CHARACTER OF SERVICE**

An interruptible supply of gas containing not less than 1,000 BTU cubic foot.

**RATE - APPLIED MONTHLY**

All gas purchased under this schedule shall be computed at a rate in consideration of HG&E cost of service and fuel costs as well as market conditions of competing alternatives available.

Where:

No. 2 Oil Price (\$/barrel): First business day of the month low posting at New Haven, CT (New Haven Harbor) per Oil Price Daily publication;

Oil BTU: 140,000 BTU/Gallon;

**NOTICE OF PRICE CHANGE**

Notice of price change will be indicated on monthly bill.

**MINIMUM CHARGE**

The minimum charge will be \$1500 per year.

**DISCOUNT**

Discount does not apply to this schedule.

**INTERRUPTION OF SERVICE**

Gas supplied hereunder is subject to interruption at any time upon twelve (12) hours' notice, except under emergency conditions, to the customer who shall discontinue entirely the use of gas until notified by the Department that it is again available. The determination of the necessity for interrupting gas service shall be made solely by the Department in each instance and shall be final and binding. The interruption of gas service shall not be the basis for claims or damages, if any, sustained by the customer by reason of such interruption.

**NON-COMPLIANCE WITH NOTICE TO DISCONTINUE USE**

If the customer fails to discontinue the use of gas after receiving notice to do so from the Department, the bill for gas subsequently used shall be at the calculated rate greater of the two methods below:

- The existing rate plus \$20.00 per mcf, however, if such failure to discontinue is due to the customer's dual-fuel equipment being temporarily inoperable, the Department at its sole discretion, may bill the customer for gas subsequently used during the emergency at the rate of \$10.00 per mcf, provided service to other customers is not impaired and provided also that the customer proceeds as expeditiously as possible to repair the dual-fuel equipment; or,
- Two (2) times the energy equivalency (EE) for the month in which the gas was consumed, however, if such failure to discontinue is due to the customer's dual-fuel equipment being temporarily inoperable, the Department at its sole discretion, may bill the customer for gas subsequently used during the emergency at the rate of one and a half time (1.5) the EE, provided service to other customers is not impaired and provided also that the customer proceeds as expeditiously as possible to repair the dual-fuel equipment

The emergency rate shall be limited to a maximum of five (5) days per year at which point the full rate will be charged. Repeat offenses will be billed at the full rate, subject to the Department's sole discretion.

The Department reserves the right to turn off service to customers who fail to discontinue use during interruption periods at its sole discretion.

#### **DUAL-FUEL EQUIPMENT**

The customer shall install and maintain in usable condition dual-fuel burning equipment and keep on hand an adequate supply of alternate fuel use when gas service is interrupted. The Department reserves the right to inspect customer facilities to confirm dual-fuel capability and ensure that only dual-fuel capable equipment is connected to the gas service. Firm sales equipment shall be metered separately with any required pipe work to isolate firm and interruptible systems to be at the customer's expense.

#### **TERM OF CONTRACT**

The term of contract under this schedule shall be for an initial period of at least one year, at the expiration of which initial period it shall automatically renew itself for like one year periods thereafter unless terminated by the Department giving to the other notice in writing 30 days prior to the expiration of any supply year.

#### **TERMS AND CONDITIONS**

Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

**INTERRUPTIBLE  
GAS SERVICE SCHEDULE - G6 (Propane)**

**AVAILABILITY**

Interruptible gas service is available under this schedule for to Commercial and Industrial customers using propane who are located adjacent to the Department's existing distribution mains, which mains have adequate capacity so that gas delivered hereunder will not impair service to other customers.

Gas supplied hereunder shall be separately metered and used only in such equipment as approved by the Department. In no case shall the gas be used interchangeably with that supplied under any other rate schedule of the Department. Reference is made to the "dual-fuel" provisions contained herein.

**CHARACTER OF SERVICE**

An interruptible supply of gas containing not less than 1,000 BTU cubic foot.

**RATE - APPLIED MONTHLY**

All gas purchased under this schedule shall be computed at a rate in consideration of HG&E cost of service and fuel costs as well as market conditions of competing alternatives available.

Where:

Propane Price (\$/gallon): Most recent weekly average retail propane price as posted by the Massachusetts Department of Energy Resources as of the first business day of the month or through an internally conducted survey of at least three regional propane suppliers;

Propane BTU: 91,333 BTU / gallon.

**NOTICE OF PRICE CHANGE**

Notice of price change will be indicated on monthly bill.

**MINIMUM CHARGE**

The minimum charge will be \$1500 per year.

**DISCOUNT**

Discount does not apply to this schedule.

**INTERRUPTION OF SERVICE**

Gas supplied hereunder is subject to interruption at any time upon twelve (12) hours' notice, except under emergency conditions, to the customer who shall discontinue entirely the use of gas until notified by the Department that it is again available. The determination of the necessity for interrupting gas service shall be made solely by the Department in each instance and shall be final and binding. The interruption of gas service shall not be the basis for claims or damages, if any, sustained by the customer by reason of such interruption.

**NON-COMPLIANCE WITH NOTICE TO DISCONTINUE USE**

If the customer fails to discontinue the use of gas after receiving notice to do so from the Department, the bill for gas subsequently used shall be at the calculated rate greater of the two methods below:

- The existing rate plus \$20.00 per mcf, however, if such failure to discontinue is due to the customer's dual-fuel equipment being temporarily inoperable, the Department at its sole discretion, may bill the customer for gas subsequently used during the emergency at the rate of \$10.00 per mcf, provided service to other customers is not impaired and provided also that the customer proceeds as expeditiously as possible to repair the dual-fuel equipment; or,
- Two (2) times the energy equivalency (EE) for the month in which the gas was consumed, however, if such failure to discontinue is due to the customer's dual-fuel equipment being temporarily inoperable, the Department at its sole discretion, may bill the customer for gas subsequently used during the emergency at the rate of one and a half time (1.5) the EE, provided service to other customers is not impaired and provided also that the customer proceeds as expeditiously as possible to repair the dual-fuel equipment

The emergency rate shall be limited to a maximum of five (5) days per year at which point the full rate will be charged. Repeat offenses will be billed at the full rate, subject to the Department's sole discretion.

The Department reserves the right to turn off service to customers who fail to discontinue use during interruption periods at its sole discretion.

#### **DUAL-FUEL EQUIPMENT**

The customer shall install and maintain in usable condition dual-fuel burning equipment and keep on hand an adequate supply of alternate fuel use when gas service is interrupted. The Department reserves the right to inspect customer facilities to confirm dual-fuel capability and ensure that only dual-fuel capable equipment is connected to the gas service. Firm sales equipment shall be metered separately with any required pipe work to isolate firm and interruptible systems to be at the customer's expense.

#### **TERM OF CONTRACT**

The term of contract under this schedule shall be for an initial period of at least one year, at the expiration of which initial period it shall automatically renew itself for like one year periods thereafter unless terminated by the Department giving to the other notice in writing 30 days prior to the expiration of any supply year.

#### **TERMS AND CONDITIONS**

Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

**GAS SCHEDULE "A"**

**AVAILABILITY**

Service under this schedule is available for all residential purposes in an individual private dwelling or an individual apartment. In the case of a multiple dwelling in which the energy is measured by a master meter, each step of the rate shall be multiplied by the number of apartments.

**CHARACTER OF SERVICE**

A continuous supply of gas not less than 1,000 BTU per cubic foot.

**RATE - APPLIED MONTHLY**

Customer Charge \$12.50

First 40 ccf @ \$1.160 per ccf

All Over 40 ccf @ \$0.920 per ccf

Definition of the gas unit for purposes of this schedule is one hundred cubic feet - abbreviation - ccf

**MINIMUM CHARGE**

Customer charge per month.

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**PURCHASED GAS ADJUSTMENT**

There shall be an adjustment in rate due to cost of gas as provided in the Department's Standard Purchased Gas Adjustment Schedule in effect from time to time.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

Filed December 14, 2022

Effective January 11, 2023

**GAS SCHEDULE "GB - 1"**  
**SMALL GENERAL SERVICE**

**AVAILABILITY**

Service under this schedule is available for commercial and industrial customers and municipal buildings having an annual usage of less than 5,000 ccf.

**CHARACTER OF SERVICE**

A continuous supply of gas not less than 1,000 BTU per cubic foot.

**RATE - APPLIED MONTHLY**

Customer Charge \$25.00

First 200 ccf @ \$ 1.005 per ccf

Excess 200 ccf @ \$0.950 per ccf

Definition of the gas unit for purposes of this schedule is one hundred cubic feet - abbreviation ccf.

**MINIMUM CHARGE**

Customer charge per month.

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**PURCHASED GAS ADJUSTMENT**

There shall be an adjustment in rate due to cost of gas as provided in the Department's Standard Purchased Gas Adjustment Schedule in effect from time to time.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

A continuous supply of gas not less than 1,000 BTU per cubic foot.

**RATE - APPLIED MONTHLY**

Customer Charge \$70.00  
First 3,000 ccf @ \$0.840 per ccf  
Excess 3,000 ccf @ \$0.785 per ccf

Definition of the gas unit for purposes of this schedule is one hundred cubic feet - abbreviation ccf.

**MINIMUM CHARGE**

Customer charge per month.

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**PURCHASED GAS ADJUSTMENT**

There shall be an adjustment in rate due to cost of gas as provided in the Department's Standard Purchased Gas Adjustment Schedule in effect from time to time.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

Filed December 14, 2022

Effective January 11, 2023

**GAS SCHEDULE "GB - 4"**  
**INDUSTRIAL CONTRACT GAS SERVICE**

**AVAILABILITY**

Service under this schedule is available for industrial customers primarily engaged in manufacturing who have executed a long-term contract and who have an annual usage greater than 100,000 ccf.

**CHARACTER OF SERVICE**

A continuous supply of gas not less than 1,000 BTU per cubic foot.

**RATE - APPLIED MONTHLY**

Customer Charge \$100.00

First 10,000 ccf @ \$0.720 per ccf

Excess 10,000 ccf @ \$0.550 per ccf

Definition of the gas unit for purposes of this schedule is one hundred cubic feet - abbreviation ccf.

**MINIMUM CHARGE**

Customer charge per month.

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**PURCHASED GAS ADJUSTMENT**

There shall be an adjustment in rate due to cost of gas as provided in the Department's Standard Purchased Gas Adjustment Schedule in effect from time to time.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

**GAS SCHEDULE "GB - 5"**  
**FIRM SERVICE TARIFF**

**AVAILABILITY/TERMS**

1. This firm service is only available to those customers which execute a contract for the service provided herein. Service under this rate shall only be available if HG&E has sufficient gas supply contracts to service the new load.
  - i. HG&E reserves the right to apply this rate to qualifying customers on a firm or interruptible basis based on gas supply availability at its sole discretion. These service terms will be specified in the executed contract.
2. This service is only available to those customers that use a minimum of approximately 2,000,000 ccf per year based on a 12-month calendar year average.
3. Monthly balancing service is a part of this tariff and is mandatory to all customers on this tariff.
4. The customer shall execute a nomination form with the Department which specifies the Maximum Daily Quantities of gas to be transported.
  - i. Maximum Daily Quantity: After consulting with the customer, the Department will assign a Maximum Daily Delivery Quantity (MDQ). The MDQ is defined as the maximum customer nomination for delivery of gas per day or the highest daily demand actually taken per day. This MDQ will remain in effect for the 12 month period following the execution of the transportation contract between the Department and the Customer. In the event that the customer exceeds this MDQ on any given day during any 12-month period, the Customer shall be considered to have immediately increased the MDQ to the actual maximum level consumed and such increased MDQ shall remain in effect for the next subsequent 12 months.
  - ii. The MDQ can be reset by the customer once per year if the customer can demonstrate that changes in their business operations will cause a permanent decrease in their MDQ.
  - iii. In the event of environmental or regulatory compliance testing requirements, the customer may seek preapproval to exceed the MDQ for two days per year. Approval shall be solely at HG&E's discretion.
5. The customer shall provide a nomination for the month, at least seven (7) days prior to the beginning of each month. The nomination shall include the total quantity of gas required for the month and the dates and durations of any planned shut downs.
6. HG&E shall purchase gas, to the extent that gas is available and able to be distributed to the customer, to cover 100% of the nominated usage volumes.
7. As a provision for the balancing services, the Department requires all transportation customers to have a real time metering. The customer shall be responsible for and make direct arrangements for transmitting information to the HG&E Gas Control Center via telephone lines or other approved means. The customer shall be responsible for the cost of the equipment necessary to transmit the real time metering information along with the cost of the telephone service. The telemetering equipment shall conform to the specifications of the Holyoke Gas & Electric Department.

8. Accounts shall be due and payable thirty (30) days after the date of rendering by the Department and if not paid when due shall be subject thereafter until paid to interest charges at a rate of 1% per month, compounded monthly.

## **Charges**

- 1) Customer Charge \$500 per month
- 2) The Local Distribution Charge (LDC) shall be \$.450 per DTH.
- 3) Commodity Charges shall be calculated as follows:
  - NYMEX close Henry Hub
    - + The applicable variable transport (Fuel) x% times NYMEX settlement  
Current Charges (as of 4/1/2023):  
3.64% TGP Zone 1-6
  - + The Applicable Commodity  
Current Charge:
    - \$0.2238 / MMBTU TGP Zone 1-6
    - \$0.0015 / MMBTU ACA Commodity surcharge
    - \$0.0018 / MMBTU PS-GHG Commodity Surcharge
    - \$0.0433 / MMBTU electric Power Cost Rate - Zone 1-6

The Fuel charge and commodity rates shall be equal to the maximum charges allowed in the Tennessee Gas Pipeline (TGP) Tariff for FT-A contracts and shall be adjusted at any time the TGP tariff adjusts.

- 4) Demand Charges: Demand Charge shall be calculated as follows:

### Fuel Premium

HG&E shall recoup the cost of the difference between any supplemental fuel required by transportation limitations or scheduled and non-scheduled pipeline interruptions, and the monthly NYMEX settlement price in effect. Supplemental fuels may include LNG, Liquefied Petroleum Gases, natural gas from alternate sources, or any other suitable and necessary type and source. Charge shall be calculated using the actual percentage basis of customer's consumption in relation to HG&E's system throughput for each day, with the following exception: During regular operations, in the absence of any non-LNG boil-off supplemental fuels, the charge shall be calculated using the MDQ percentage as calculated above, regardless of actual consumption of the alternate fuel consumed. (Customer to pay for their share of boil-off LNG, LNG vaporized for peak shaving, and any other non-pipeline fuel or source purchased at a premium to pipeline gas.)

Quantities used in calculations of cost shall be net of any Sales for Resale volume that may coincide in the period.

For customers on an interruptible tariff, if supply is made available when HG&E exceeds its pipeline capacity, customer shall be charged the full supplemental fuel premium (i.e. – 100% of customer's consumption for said Gas Day)

### Production Energy

HG&E shall recoup the cost of energy used when LNG or other supplemental gas supply requires a source of energy (natural gas or other) for its production and delivery. A typical application is the

energy used to vaporize LNG and compress, stabilize, or otherwise treat -exclusive of odorizing, as needed for deliverability. The primary HG&E account is 10-812-00-1 "Gas Used in Utility Operations."

Quantities used in calculations of cost shall be net of any Sales for Resale volume that may coincide in the period.

### **Demand Charges**

The following costs shall be assigned according to the MDQ percentage calculation, with values taken directly from HG&E monthly income statements.

#### Pipeline Demand Charges

Combination of transportation contract fixed charges for transporting natural gas from HG&E receipt points on the Tennessee Gas Pipeline and/or other system(s).

#### Supplier/LNG Demand Charges

Fixed contract charges for rights to purchase or store LNG, purchase and receive other fuels, independent of commodity and fuel transportation charges.

#### Other Supply Expenses

Non-categorized right and proper expenses related to management, procurement, and processing related to fuel supplies and rates.

#### Other Supply Labor

Non-categorized right and proper labor costs related to management, procurement, and processing related to fuel supplies and rates. Not to include benefits of any kind.

#### Production Supervision Labor

All right and proper labor costs related to the supervision of staff and management of the LNG and City Gate Station facility. Not to include benefits of any kind.

#### Production Expenses

All right and proper non-labor costs related to the operation and maintenance of the LNG and City Gate Station facility. Not to include benefits of any kind.

#### Production Labor

All right and proper labor costs related to the operation and maintenance of the LNG and City Gate Station facility. Not to include benefits of any kind.

Summary of Demand Charge Items and Accounts

- 5) **Balancing Charges:** Balance charges shall apply to Commodity Charges only.
- a. For gas purchased over the monthly nomination the charge shall be based upon the Commodity Charge calculation in Section 3 except the NYMEX close is replaced by the Henry Hub Natural Gas Spot Price, as reported by EIA, and it is multiplied by the appropriate percentage from the following table.

Monthly Over Deliveries to the Customer's Meter

	EIA Spot Price
0-10%	100%
10%-15%	115%
15%-20%	130%
20%+	140%

- b. For volumes of the monthly nomination not consumed will be purchased back purchased back at the average based upon the Commodity Charge calculation in Section 3 except the NYMEX close is replaced by the Henry Hub Natural Gas Spot Price, as reported by EIA, and it is multiplied by the appropriate percentage from the following table.

Monthly under Deliveries to the Customer's Meter

	EIA Spot Price
0-10%	100%
10%-15%	85%
15%-20%	70%
20%+	60%

For customers on interruptible service, the Demand Charges will be representative of the percentage of days in the month that gas was available for consumption. HG&E shall not be liable for any operational or financial impacts as a result of supply being curtailed under interruptible status on this rate schedule.

*Effective: July 1, 2023*

## **STREET & TRAFFIC LIGHTING**

### **AVAILABILITY**

Service under this rate schedule is available monthly for all municipal street lighting and traffic signal purposes in the City of Holyoke.

### **RATE-APPLIED MONTHLY**

The monthly energy consumption billed for street lighting consists of three components: Multiple Street Lights, Unmetered Traffic Signals, and Decorative Street Lighting. The kWh contribution of each of the these components represents the monthly total kWh consumption billed at the applicable \$/kWh rate which is determined for each annual period from July through June of the following year per Massachusetts General Laws Chapter 164, Section 58.

Renewable Energy Charge at \$0.00050 per kWh (Not subject to any discounts.)

Other monthly charges that are billed to the City of Holyoke include, but are not limited to, the following: Daylight Savings Time (DST) Charge, Maintenance Charge, Deluxe HPS Charge, and Turn On/Off Charge.

The kWh contribution calculations, procedures, and details on monthly charges are in accordance with Department Policy #DB-1 entitled "Street & Traffic Light Billing", in effect from time to time.

### **DISCOUNT**

No discount applies to street & traffic lighting.

### **TERMS AND CONDITIONS**

Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts", in effect from time to time, where not inconsistent with any specific provisions hereof.

## DISTRIBUTED GENERATION PURCHASED POWER CLAUSE

### AVAILABILITY

This clause is applicable to all electric rate schedules. Qualifying distributed generation (DG) systems hereinafter called "Facility" or "Facilities" include, but are not limited to: Photovoltaics, Wind, Hydroelectric, Biomass, Fuel Cells, Combined Heat and Power (CHP), and Municipal Solid Waste with generation facilities rated 500 kW or less. Any DG system rated greater than 500 kW needs to be contracted through Department under a separate written agreement. If customer proposes a different DG system than specifically stated above, then customer must provide written request to Department which will conduct a 30 day review to determine if such DG system is qualified or not under this clause.

### RATE - APPLIED MONTHLY

A \$2.00 monthly customer charge for the qualifying Facility meter shall be provided.

All monthly kWh produced by the Facility will be credited to the customer on their monthly invoice. The amount of credit due to customer includes a Wholesale Energy Rate applicable to the Facility type installed at customer site. The applicable Wholesale Energy Rate, specific to Facility types installed and/or requested within Department's service territory, will be posted and updated at Department discretion from time to time on its website as warranted. All other rates and charges in effect are not included in the credit amount.

*Total credit due customer = (Monthly kWh produced by qualifying Facility) x (Wholesale Energy Rate in effect for applicable Facility type) - \$2.00 monthly customer charge*

There is no minimum amount on a monthly bill. Credit is based solely on kWh produced by the Facility. Payment to the customer will first be applied to any outstanding bills. If credit is greater than customer's bill, then the additional credit balance will be applied to the next monthly invoice.

As a further incentive to the Department's increase in carbon-free resources, qualifying Facilities will not be subject to a Standby Facilities Generation Charge. Additionally, photovoltaic (solar) projects will be eligible for applicable On-Peak Wholesale Energy Rate that is a higher credit than the monthly average applicable rate.

### TERMS AND CONDITIONS

This rate is subject to termination at any time upon notice to the Department. Service is governed by the "Rules and Regulations" and the "Distribution Generation Policy" of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts, as in effect from time to time. The Department may impose additional Terms and Conditions, as it deems necessary, in its sole discretion, for the protection of its distribution system, service territory, or its customers. Failure of the Facility to comply with any of the referenced terms and conditions may result in disconnection of the Facility from the Department's system.

Filed October 10, 2012

Effective November 10, 2012

## POWER WHEELING SERVICE

### AVAILABILITY

This clause is applicable to any customer with generating facilities (Facility) for the purpose of wheeling (carrying) power to the 115 kV transmission system (Delivery Point), which is through and beyond the Department's applicable distribution and substation facilities. This is for customers who desire to sell any or all generation either into the wholesale market or to others via the interconnected power grid. The Department prohibits the selling of any generation to any other customer within the Department's service territory, with exception of separate agreements that can be executed between customer and Department. Capacity requested for, and any subsequent six (6) month advanced notice increase request, are contingent upon availability and at the discretion of the Department.

### RATE - APPLIED MONTHLY

\$ 4.26 per kilowatt of contracted capacity

It is intended that the above rate will be updated annually based on applicable cost variations to Department's distribution, substation, metering, and loss components as applicable to wheeling such power from customer's site to the Delivery Point.

There is no discount to the above rate. All bills shall be payable upon receipt. All bills unpaid after thirty (30) days will be subject to an interest charge of 1.5% per month on unpaid balance.

### TERMS AND CONDITIONS

Customer will contract for a fixed monthly capacity reservation for a minimum period of three (3) years. Contract will continue on an annual basis thereafter. Contracted capacity shall equal the billable kilowatts of wheeled capacity irrespective of whether or not any energy was actually transported by HG&E and whether or not such actual wheeled capacity was at or below the contracted amount. Inadvertent excess and uncontracted capacity requirements (actual wheeled capacity above contracted amount) placed on the Department's system shall be billed at ten (10) times the above rate for such excess. The excess will continue to be billed at ten (10) times the above rate, until such time as the excess condition is removed or until contracted with the Department.

Connection to the Department's system shall be at customer expense, including any costs associated with metering and communications that allow for the Department to have real-time access to generator's status and performance. The Department shall determine the exact location of point of interconnection and Delivery Point.

Service is governed by the "Rules and Regulations" and the "Distribution Generation Policy" of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts, as in effect from time to time. The Department may impose additional Terms and Conditions, as it deems necessary, in its sole discretion, for the protection of its distribution system, service territory, or its customers. Failure of the Facility to comply with any of the referenced terms and conditions may result in disconnection of the Facility from the Department's system.

CITY OF HOLYOKE  
GAS & ELECTRIC DEPARTMENT

## **METERBASE SURGE PROTECTION**

### **AVAILABILITY**

This service is available to most residential and commercial customers who have single phase electric service.

### **RATE-APPLIED MONTHLY**

Meterbase Surge Protection \$4.25

### **DISCOUNT**

No discount applies to meter base surge protection devices.

### **TERMS AND CONDITIONS**

The above monthly rate for the meter base surge protection devices includes the cost of all material and labor.

This contract shall be for be in effect on the date the equipment is installed and will continue for a minimum term of forty-two (42) months from date of installation and is cancelable on thirty (30) days notice. If a device is used for less than forty-two (42) months, the customer will pay a \$50 removal fee. There shall be no removal charge if agreement is canceled after the initial forty-two (42) month period.

Service is governed by the "Surge Protection Agreement" of the Holyoke Gas & Electric Department.

### **POINT OF USE OPTIONAL SERVICE**

A warranty registration card will be required to be filled out by the customer upon the purchase of a point-of-use device and the City of Holyoke Gas & Electric Department will not be responsible for warranties and guarantees of the point-of-use device. Massachusetts State Sales Tax will be added to the cost of the point-of-use devices at the time of billing.

Filed: October 2, 2013

Effective: January 1, 2014

**ECONOMIC DEVELOPMENT DISCOUNT**

**AVAILABILITY**

Service under this schedule is available for Holyoke customers who meet Department requirements per Terms and Conditions. Discounts as follows will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**DISCOUNT**

	<u>Year 1</u>	<u>Year 2</u>	<u>Year 3</u>
<b>Gas &amp; Electric</b>	10%	10%	10%

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts", the "Economic Development Discount Program", and the "First Time Homebuyer Terms & Agreements". No discounts shall apply to Renewable Energy Charge, Assistance provided under Energy Conservation Program, any charges or fees not specifically included within the applicable gas and/or electric rate schedule(s), and any special services rate schedule (i.e. contract lighting, surge protection, ..).

Filed April 16, 2014

Effective June 4, 2014

**HYDROELECTRIC POWER  
ADJUSTMENT CLAUSE**

**AVAILABILITY**

This clause is applicable to Department electric rate schedules which provide service to residential customers only.

**HYDROPOWER ADJUSTMENT**

The cost per KWH for all energy will be adjusted due to the power costs resulting from the purchase by the Department of hydroelectric power from the Niagara project. The adjustment in cost per KWH will be determined by computing any savings in power costs from the Niagara Project including production, fuel and transmission costs and dividing by the concurrent KWH sold for residential purposes. The credit applied will be adjusted from time to time such that the savings in power costs will accrue entirely to the Department's residential customers.

Filed November 1, 2016

Effective December 1, 2016

**STANDARD PURCHASED POWER  
ADJUSTMENT CLAUSE**

**AVAILABILITY**

This clause is applicable to all electric rate schedules.

**PURCHASED POWER ADJUSTMENT**

The cost per KWH for all energy will be adjusted upward or downward for changes in fuel and purchased power costs including transmission above or below the base amount of \$.065 per KWH. When the total cost of fuel, purchased power, and transmission varies above or below the above base cost a charge or credit per KWH will be applied to all energy sold such that the cost or credit will be recovered or returned over time.

Distribution Fixed:	0.00406	0.00	
Distribution Variable:	0.00302	4.96	
Renewable Energy Charge:	0.00050		

**DEMAND**

The demand charge will be the highest thirty-minute average demand during the Department’s on-peak hours for the billing period.

**POWER FACTOR CHARGE**

An additional charge of \$.001 per kWh will be added to bills in any month where a power factor of 85% is not maintained.

**RATE ADJUSTMENTS**

The rates shown above will be in place from July 1, 2023 through June 30, 2028. Rate changes, if any, per long term contract will occur January 1<sup>st</sup> of each year and remain in effect through end of each calendar year.

**TERMS AND CONDITIONS**

Bills are due and payable as described in long term contract. Service is governed by the “Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts”.

A Renewable Energy charge established by the State Legislature shall be accessed which allows customer’s participation in the Massachusetts Renewable Energy Trust. Current rate level which has remained unchanged since January 1, 2003 is shown

## Overview

These Rules and Regulations are applicable to and made a part of all service classifications. This applies to all customers, or potential customers, requiring electric and/or gas service within the franchise area of The City of Holyoke Gas and Electric Department, hereinafter referred to as HG&E. Any terms and conditions that are inconsistent with any specific provisions of any service classification shall not apply.

## Section One: Customer Service

### Application for Service

Application for service must be made either in person at the Main Office of HG&E, 99 Suffolk Street, Holyoke, MA, or electronically at [www.hged.com](http://www.hged.com). Service will be initiated, in most cases, within 48 hours after receipt of all information required.

Applicants for service must present the following:

1. Complete application for service.
2. Payment for any previous account balances. Please note you may be responsible for unpaid liens.
3. Two (2) forms of valid identification, with one being a photo.
  - a. State Identification Card
  - b. Social Security Card
  - c. Driver’s License
  - d. Passport
  - e. Birth Certificate
4. A deposit may be required after a review of all available credit information.
5. Evidence of authority:
  - a. Residential Rental Property: applicants must provide a lease or rental agreement.
  - b. Homeowners: purchase and sale agreement.
  - c. Commercial Property: depending on how the account is set up, applicants must provide any one of the following,
    - i. For accounts where the application is signed by the individual whose name appears on the deed, the applicant must provide a copy of the deed.
    - ii. For accounts where the application is a Doing Business As (DBA), the applicant must provide a Business Certificate or Certificate of Occupancy.
    - iii. For accounts where the application is a Limited Liability Corporation (LLC) or Incorporated (Inc), the applicant must provide a Certificate of Organization.

If a person, other than the customer of record, begins to use service without first notifying HG&E in person, and allowing HG&E personnel to read the meter, such person will be considered a customer and held financially responsible for the amount due for service from the date on which the previous customer terminated service or the date on which such person first began to take service, whichever is later. HG&E will calculate this amount based on reasonable verification of the date on which such person became a customer. Once HG&E finds use by

a non-customer, HG&E will terminate service until the new customer completes an application and pays for such calculated use. HG&E reserves the right to refuse service, at any location, to an applicant who is indebted to HG&E for any service furnished to such applicant; however, HG&E shall commence service if the applicant has paid the past due balance and completed all required paperwork.

The customer, having entire control of equipment beyond the meter, is responsible for any leakage, waste, or theft of gas or electric which may occur after it has left the meter. In situations where metered supply is not exclusive to a tenant, the tenant's landlord will be the customer of record under this section.

When a customer applies for service, HG&E will give the customer a description of the rates available and will provide the customer details on the most appropriate rate available based on the customer's description of the service characteristics. If HG&E is subsequently notified by a customer of a change of the customer's service characteristics, the most appropriate rate will be given to that customer; however, responsibility for selecting the most appropriate rate remains the sole responsibility of the customer, subject to the provisions of the Schedule of Rates. HG&E will not be liable for any claim that service provided to any customer might have been less expensive or more advantageous to such customer if supplied under a different rate. Unless specifically stated to the contrary, all rates are based on the supply of service to the customer throughout the twelve (12) months of the year and are not subject to change more than once in a twelve (12) month period.

**Start, Stop, or Move Service**

1. Start Service:

- a. Activate an existing electric or natural gas service: If your new location previously received electric or natural gas service from HG&E, already has a meter and qualifies for restoration of service, visit our Main Office during normal business hours, or electronically at [www.hged.com](http://www.hged.com). New customers will need to supply two valid forms of identification, including a government issued form of photo identification (see Application for Service). You also will be required to sign an application form. A deposit may be required based on available credit information.
- b. Install a new service: See Gas Section (Page 17) or Electric Section (Page 22).

2. Stop Service:

- a. Terminating service is as easy as giving HG&E Customer Service a call at (413) 536-9300, option 2, visiting the Main Office, or electronically at [www.hged.com](http://www.hged.com). We do require 24 hour notice to terminate service. Please note that only the customer of record can terminate service. We will verify your personal information prior to terminating any account. Customers are responsible for all energy consumed until we have been notified to terminate service and we have been provided access to the meters.
- b. HG&E reserves the right to refuse or discontinue service under the following conditions, and in accordance with and subject to applicable statutes, and duly adopted regulations of the Department of Public Utilities of the Commonwealth of Massachusetts, as in effect from time to time:
  - i. if any bills for service or for charges in contracts for the extension of service are in arrears where equitable payment arrangements cannot be made for such arrearages,

- ii. if the customer fails to comply with the ordinances or regulations of duly constituted authorities or of the National Board of Fire Underwriters, or fails to supply at their expense proper certificates of compliance with such ordinances or regulations at HG&E’s request,
    - iii. if prior indebtedness of a customer for the same class of service at the same or another location is not paid in full before service is established, or equitable payment arrangements are not established,
    - iv. if a former customer who is indebted to the company attempts by fraud to obtain service, until such time as payment or equitable payment arrangement is made for all money said customer owes HG&E,
    - v. if a successor to a customer subject to a contract for the extension of service refuses to pay the amount required thereunder,
    - vi. if HG&E determines that an unsafe operating condition exists or develops, or
    - vii. if a gas moratorium exists and the service would not qualify for restoration of service.
  - c. HG&E, upon reasonable notice, may discontinue service for the following reasons:
    - i. for any purpose of making non-emergency permanent or temporary repairs, changes, or improvements in any part of its system,
    - ii. for compliance in good faith with any government order or directive,
    - iii. any of the following acts or omissions on the part of the customer:
      - 1. Non-payment of a valid bill for service furnished at a present or previous location,
      - 2. Customer moves from the premise, unless customer requests that service be continued,
      - 3. Service is provided to others (sub-metering),
      - 4. Failure to provide payment as provided for in these terms and conditions,
      - 5. The customer’s installation poses a potential hazard to life or property, or
      - 6. Customer refuses reasonable access to HG&E’s employees
  - d. HG&E may discontinue service immediately for the following reasons:
    - i. for any purpose of making emergency permanent or temporary repairs in any part of its system,
    - ii. Tampering with any facility of HG&E by customer,
    - iii. Connecting and operating equipment of customer in a manner so as to produce disturbing effects on the service of HG&E or other customers, or
    - iv. The customer’s installation poses an immediate hazard to life or property
- 3. Move Service: If you will be moving from one location to a new location within HG&E’s service territory, please visit the Main Office or electronically at [www.hged.com](http://www.hged.com). Customers will need to supply two valid forms of identification, including a government issued form of photo identification (see Application for Service). An additional deposit may be required based on customer credit history.

**Authorized Personnel**

Service to any customer shall not be turned on or off by anyone other than an authorized agent of HG&E. This applies to all classes of service, including, but not limited to, residential, commercial, and industrial.

HG&E employees or agents authorized to enter upon a customer’s premise are provided with identification cards, which will be shown upon request. Customers are advised not to admit to their premises anyone claiming to represent HG&E, unless they can produce a proper identification card.

**Deposits**

Any required deposit shall be determined in accordance with regulations set forth by the Massachusetts Department of Public Utilities (DPU) and Massachusetts General Laws, Charter 164, Section 58A and may be equivalent to the total of the three (3) highest estimated billings for a twelve (12) month period.

Deposits shall be held on an account until the account is terminated and will then be refunded to the customer of record. Deposits retained for more than six (6) months will accrue interest per Massachusetts General Laws, Chapter 164, Section 58A.

Deposits for **Starting** Service

**Residential** Customer Deposit:

- A deposit may be required for residential customers who are non-homeowners. Deposits may also be required from homeowners if credit history is poor.
- New-service applicants who pose no credit risk, as indicated by a Green Light returned on the ONLINE Utility Exchange (or equivalent), will be charged no deposit.
- New-service applicants who pose minimal risk, as indicated by a Yellow Light returned on the ONLINE Utility Exchange (or equivalent), will be charged a deposit of \$125.00.
- New-service applicants who pose substantial credit risk, as indicated by a Red Light returned on the ONLINE Utility Exchange (or equivalent), will be charged a deposit of \$300.00
- If service has been terminated due to non-payment and a new customer, who has been living at the subject service address, per the same lease agreement applicable to the terminated service, wishes to establish service in their name, that customer will be subject to a deposit equivalent to the average of the three (3) highest estimated billings for a twelve (12) month period.
- A service applicant who provides a social security number that is returned as deceased, non-issued, belonging to a person under the age of 18, or belonging to a person other than the applicant, or is fraudulent, shall be required to provide a valid social security number as well as additional proof of identity (i.e. valid driver’s license, Social Security Card, etc.) before service will be activated.
- HG&E cannot demand that an applicant provide their social security number as a requirement for service. However, it is our policy that applicants who refuse to provide their social security number pose a greater credit risk and shall be charged the maximum deposit.
- Existing customers who move and did not have a deposit on file and have a bad payment history will be charged \$300.00.

These deposits must be paid prior to receiving service. All deposits must be paid in cash, or by a money order, before new service will be authorized. Deposits may not be paid with a credit card unless the customer has been billed for the deposit amount.

**Commercial Customer Deposit:**

- Payment of deposit is required to initiate service.
- The deposit amount is equal to the total of the three highest estimated billings for a twelve month period or estimated billing at the same or a comparable commercial service address for the previous 12 months.
- The deposit will be held on account until the account is terminated, and will be refunded to the customer of record.
- Consideration on deposits will be given if the customer opts for one of the following alternatives: 1) The application for the commercial account is signed by the individual whose name appears on the deed for the property; 2) the customer enrolls in auto payment arrangement, however, any default on an auto payment arrangement shall require a deposit to continue service; 3) the customer has existing deposits with HG&E for other accounts, that in the sole opinion of the Customer Service Supervisor are deemed sufficient to cover the new account, and the customer gives HG&E an acceptable pledge of existing deposits, or surety bond for all accounts.

**Getting Your Deposit Waived**

Residential customers may be eligible to have their deposit waived with:

- Favorable result from ONLINE Utility Exchange report (or equivalent).
- City of Holyoke Gas & Electric (HG&E) Account History:

HG&E may waive a required deposit if a customer demonstrates a good credit history with HG&E.

A good credit history must include the following, at a minimum:

- No disconnections for non-payment,
- No late payments,
- No outstanding balances, and
- 12 months of consecutive service

**Getting Your Deposit Refunded**

HG&E will refund deposits to customer accounts, including interest earned, when service is discontinued by customer. HG&E deposit will be refunded in the month after compliance with the following:

- The total balance due has been paid, and
- Residential customers with **one year of good payment** history may request to have their deposit returned if a record of satisfactory compliance with **Customer Payment Standards**.

## Bankruptcy

It is the policy of HG&E that, within 21 days after the date of the order for relief, a customer that has filed for bankruptcy furnish adequate assurance of payment, in the form of a deposit in accordance with Section 366 of the Bankruptcy Code and Massachusetts General Laws c. 164, SS 58A. A sufficient deposit to secure the payment for gas or electricity in the amount of 3 months estimated payments will be required.

## Fees

A fee of \$30.00 per meter will be charged to all customer classes for the initiation of service. This charge will be placed on the first bill. In the event that HG&E has to make more than one trip to access a property for a turn on/off, a trip charge equal to the first 30 minutes of the applicable service rate will apply for each extra trip.

A fee of \$25.00 will be charged to any customer after a first returned check for insufficient funds. There is no charge for the first offense. This charge also applies to Auto Pay customers. Auto Pay customers will be removed from Auto Pay after a second offense.

## Meter Reading

1. **Estimated Billing:** A reading obtained from either a HG&E remote meter reading system or from a physical visit from an HG&E representative is considered an actual read. HG&E shall obtain a physical meter reading from an HG&E representative at least once every three (3) years. If HG&E is unable to read the meter when scheduled for any reason, or if the meter for any reason fails to register the correct amount of gas and/or electricity supplied or the correct demand of any customer for a period of time, HG&E shall make a reasonable estimate of the consumption of gas and/or electricity during those months when the meter is not read, based on available data, and such estimated bills shall be payable as rendered.
2. **Access to Meters:** A properly identified and authorized representative of HG&E shall have the right to gain access at all reasonable times and intervals, including using the services of a locksmith for the purpose of reading, installing, examining, testing, repairing, replacing, or removing HG&E meters, meter reading devices, wires, or other electrical equipment and appliances, or of discontinuing service, in accordance with Mass General Law Chapter 164, Section 116, Mass DPU regulations, and HG&E policy, and the customer shall not prevent or hinder HG&E's access.
3. There are situations that require HG&E to enter a premise in order to obtain a meter reading, initiate or terminate gas or electric service, or perform other maintenance on HG&E equipment at the premises. If a tenant terminates service and the landlord refuses access to HG&E, the account will be placed in the name of the landlord until the landlord provides access to HG&E.
4. **Accuracy of Meter:** HG&E shall maintain the accuracy of all metering equipment pursuant hereto by regular testing and calibration in accordance with recognized standards. Any meter which does not vary more than 2% above or below the recognized comparative standard shall be considered accurate. After

a thorough investigation by HG&E, a customer may request HG&E to test the accuracy of any of its metering equipment installed upon the customer’s premises. HG&E may, at its option, and with proper notification and cost estimates provided to the customer, assess a minimum fee of \$25 or the actual costs of services rendered per each meter test if the meter is found to be accurate. If the meter does not register accurately, no fee will be assessed to the customer and any appropriate adjustment/rebilling shall be made.

This fee applies to all electric meters and only to gas meters up to a capacity of 1000 cubic feet per hour. Meters larger than 1000 cubic feet per hour will be assessed a fee equal to the crew time required to exchange the meter and relight all affected equipment.

5. Pulse Output: A customer may request pulse outputs from a gas or electric meter by submitting a completed Application for Meter Pulse Output. HG&E is not responsible for any false or misinterpreted pulse readings by the customer. Also, since not all locations are capable of providing pulses, the cost to provide pulses, including any necessary instrumentation, labor and materials will be at the expense of the customer. HG&E reserves the right to terminate the pulse outputs at any time at their sole discretion.

For more information see Gas Metering (Page 17) or Electric Metering (Page 23).

6. Remote Metering Opt-Out Program: This service is available for any customer who requests an alternative meter that does not have wireless communication.

A one-time installation fee will be applied to the customer due to the services required to replace the existing metering. This will include: i) the removal of the existing meter, ii) procurement, testing, and installation of the alternative meter, iii) spare inventory, and iv) all back-office functions required. Any meter(s), electric or gas, that are located inside a dwelling (or otherwise inaccessible as determined by HG&E) shall be moved to a suitable outside location agreeable to HG&E at full cost to the customer.

The first meter to be replaced is \$29/month and \$4.50/month for each additional meter. There will be an additional charge to a customer bill to support the administrative, labor, and maintenance costs of manual meter reading. If a customer participates in HG&E’s Auto Pay, then the frequency of the meter reads can be reduced from twelve to four per year and the aforementioned rates would occur just four times per year but spread out over a full annual period.

**Billing**

Unless otherwise specified in the service classifications, rates and charges are based on monthly cycle billing. HG&E will schedule meters to be read and billed on a monthly basis.

All bills are due when rendered and payable within 45 days at the Main Office, at any authorized collector, or online at [www.hged.com/payonline](http://www.hged.com/payonline). If payment is received by HG&E, together with any arrearage, within fifteen (15) days of rendering, a ten percent (10%) prompt payment discount shall apply as well as any special discounts given for any reason.

Bills shall be deemed rendered and any other notices duly given when delivered to the customer personally or when mailed to the customer at the premises supplied, or at the last known address of the customer or when left at either of such places.

If and whenever the customer is in arrears of any bill due to HG&E, or in case of violation of any terms and conditions under which service and/or material is supplied to the customer, HG&E may shut off the supply of electric and/or gas and may enter the customer’s premises and remove the meters, piping, cabling, and other materials which have been installed at HG&E’s expense. Meters may also be remotely shut off and turned on. HG&E is not liable for any damages that may be caused due to a service turn-on or turn-off, whether remote or otherwise. The customer agrees to take all necessary steps to assure that all appliances are clear and free of any objects that may cause damage to the property where service is being initiated or restored.

In the event that service has been shut off due to nonpayment, the following charges will apply:

1. If the service is terminated, one of the following charges plus the overdue balance must be paid, in cash or money order only, prior to service restoration. In the event that service is turned on after hours, the customer must make this payment the following business day. Failure to make this payment will result in the service being terminated.

\$35.00	If the service is restored, Monday through Friday, 8:30 AM to 4:30 PM.
\$135.00	If the service is restored by the Service Department after 4:30 PM during the week or anytime on Saturday or Sunday.

Additional charge(s) may apply:

\$25.00	If the service is not shut off, but we made a trip to customer.
---------	---

2. If an outside gas or electric crew terminates service, a fee of **\$175.00** will be required prior to restoration for the shut off during the hours of 7:00 AM and 3:00 PM on weekdays excluding holidays. A fee of \$300.00 will be required for restoration by a crew outside of these hours.

If a check is returned on a pending shut off notice, only cash or a money order will be accepted to restore service.

Residential customers having two (2) personal checks returned for insufficient funds in one (1) year must make payment with cash, bank check, or money order for one (1) full year. Customers on Auto Pay will be removed from Auto Pay after two (2) returned payments and must pay a deposit to continue service.

Commercial customers having two (2) business checks returned for insufficient funds in one (1) year must make payment with cash, bank check, or money order for one (1) full year. Customers on Auto Pay will be removed from Auto Pay after two (2) returned payments and must pay a deposit to continue service.

**Limitations of Liability**

There are no warranties regarding service including those involving merchantability and fitness for a particular purpose, or arising out of a course of dealing or usage of trade. The sale is made “as is”.

Nothing in these Rules and Regulations shall be construed as placing upon HG&E any responsibility for the condition, maintenance, or safety of a customer’s appliances, pipes, electric main and service cabling, or other equipment; and HG&E shall not be responsible for any loss or damage resulting from defects, failures, or malfunctions in or originating in any pipes, appliances, electric main and service cabling, or other equipment which is not owned by HG&E. HG&E shall not be responsible for damage to persons or property arising from the use of gas and/or electricity and the presence of gas or electricity or HG&E's equipment on the premises of the customer.

Notwithstanding any other provisions of this or any other rule and regulation:

1. It is the responsibility of the customer to protect themselves, any third parties, and any property from the use, misuse, and/or availability of electric and/or gas on their premises and from the consequences of the use, misuse, and/or availability of electric and/or gas on their premises.
2. It is the responsibility of customers to provide, install, use, inspect, and maintain suitable safety and protective devices to guard themselves, life, and property from any defect, failure, or malfunction in or originating in any pipes, appliances, electric main and service cabling, or other equipment which is not owned by HG&E; and to protect themselves, life, and property from the consequences of any defect, failure, or malfunction in or originating in any pipes, appliances, electric main and service cabling, or other equipment which is not owned by HG&E.

By accepting service from HG&E and paying the current rates, the customer agrees that HG&E shall not be liable in any direct or indirect manner for any interruption, reduction, abnormal pressure or voltage, discontinuance or reversal of HG&E's service, due to causes beyond its immediate control, whether caused by fire, explosion, flood, weather conditions, accident, labor difficulties, conditions of fuel supply, the acts of any public authority, reduction in pressure or voltage, selected interruptions or black-outs, or failure to receive any gas and/or electricity for which in any manner it has contracted, or due to the operation in accordance with good utility practice of an emergency interruption and/or load reduction program by HG&E or one with whom HG&E has contracted for the supply of gas and/or electricity or inability for any other reason to maintain uninterrupted and continuous service; provided, however, that if HG&E is unable to supply gas and/or electricity for a continuous period of forty-eight (48) hours or more to firm service customers, that upon written request of the customer, charges, if any, shall be suspended for the remaining duration of such interruption.

The customer also agrees that HG&E shall not be liable for damages or injuries to the customer or any third person resulting from the use of services or the presence of HG&E's meters or appurtenances upon the customer's premises. The customer further agrees that HG&E shall not be liable for any damage to customer's equipment due to any cause.

These Rules and Regulations are severable. Any holding by a Court of competent jurisdiction that a word, phrase, or portion of these Rules and Regulations are unenforceable shall not affect the enforcement of the remainder of these Rules and Regulations. These Rules and Regulations shall be enforceable to the fullest extent of the law.

## Incentive & Discount Programs

### Energy Conservation Program

1. Residential: This program is available to residential class customers who own their own home and wish to install or upgrade gas fired boilers, furnaces, conversion burners, hot water heaters, heat pumps, and/or central air conditioning as well as solar thermal or solar generation. In the event of a gas moratorium, the terms of the moratorium will supersede this section. Other energy conservation or efficiency measures may also be considered under this program provided an energy audit is performed prior to submitting an application or such energy audit is waived by HG&E upon review at the request of customer. The program provides assistance granted at 0% interest up to \$5,000 for an owner occupied single family unit and \$10,000 for an owner occupied multi-family unit up to \$5,000/unit. The length of the program is sixty (60) months. For assistance less than \$2,000, the maximum period for payback will be thirty-six (36) months. Solar generation projects are eligible for assistance at 0% up to \$10,000 with a length of the program at one hundred twenty (120) months. Applicants are required to pay a \$100 administrative fee to participate in the program. Assistance is provided for products installed no more than ninety (90) days before the receipt of application and work completed within twelve (12) months of application. Program benefits do not apply to new home or building construction. If a customer participates in the Energy Conservation Program, they are still eligible for other HG&E incentive programs such as First Time Home Buyer incentive and Energy Star rebates. Siding, roof replacements, and on-site electric generation (other than solar) are not covered under this program. Applicant's building must receive gas or electric service from HG&E. In the case of heating, water heating and cooling equipment installations, the building in question must purchase the required fuel from HG&E. In the case of solar installations the customer must purchase electric from HG&E. Additional program details are included on the application form.
2. Commercial/Industrial: This program is available to commercial and industrial class utility customers and to owners of non-owner occupied residential investment properties who wish to install or upgrade gas fired boilers, furnaces, conversion burners, hot water heaters, heat pumps, and/or central air conditioning as well as solar thermal or solar generation. In the event of a gas moratorium, the terms of the moratorium will supersede this section. Other energy conservation or efficiency measures may also be considered under this program provided an energy audit is performed prior to submitting an application. The program provides assistance granted at 0% interest up to \$20,000 for a non-owner occupied multi-family investment property up to \$2,500/unit. Requests for installation of energy efficient lighting or manufacturing equipment are handled on a case-by-case basis. The length of the program is on average sixty (60) months, however will be customized in length to be reflective of payback periods anticipated for such program work. Solar generation projects are eligible for assistance at 0% up to \$10,000 with a length of the program at one hundred twenty (120) months. Applicants are required to pay a \$100 administrative fee to participate in the program. Assistance is provided for products installed no more than ninety (90) days before the receipt of application and work completed within twelve (12) months of application. If a customer participates in the Energy Conversation Program, they are still eligible for other HG&E incentive programs, including the Economic Development

Discount. Siding, roof replacements, and on-site electric generation (other than solar) are not covered under this program. Applicant’s building must receive gas or electric service from HG&E. In the case of heating, water heating and cooling equipment installations, the building in question must purchase the required fuel from HG&E. In the case of solar installations the customer must purchase electric from HG&E. Additional program details are included on the application form.

In order to apply for this program, the customer must complete the program application and submit it to HG&E Customer Service with the following information:

1. Copy of recorded Deed clearly showing the book #, page # & date recorded,
2. Written proposal signed by the contractor performing the work indicating the equipment being installed meets the energy efficiency terms of the program, and
3. A copy of an energy audit performed by HG&E’s energy audit vendor, if applicable.

If the customer is approved, this information is used to produce a contract between HG&E and the customer which details the terms and conditions and provides HG&E with a municipal lien to secure payment. Once the work has been completed, the customer must submit all receipts, invoices, window labels or proof of Energy Star rating with U-factor, and proof of installation form as applicable before a check is processed. The payment will appear as a separate line item on the customer’s bill.

**Economic Development Discount Program**

1. **First Time Homebuyer (Residential):** This program is available to residential customers who are new to Holyoke (Southampton residents are not included in the program). Discounts on gas and/or electric services, in addition to the 10% prompt payment discount, are offered at 10% for each of the first three (3) years. This program is governed by the “First Time Homebuyer Terms & Agreements”, which is amended from time to time.
2. **Economic Development Discount (Commercial):** This program is available to all commercial/industrial customer classes who are new to Holyoke (Southampton businesses are not included in the program). Discounts on gas and/or electric services, in addition to the 10% prompt payment discount, are offered at 10% for each of the first three (3) years. The term of this contract is ten (10) years during which time the customer agrees to purchase all energy requirements, as applicable, from HG&E. Also, non-residential customer classes are eligible to reapply for another three (3) year term of discounts on expanded portions of their energy load. These programs are governed by the “Economic Development Discount Program” which is amended from time to time.

## Section Two: Gas

### Classifications of Service

Where a question arises as to which classification applies, HG&E will decide on the basis of its regulations. There are three (3) types of gas service classified by HG&E:

1. Firm Gas Service: Under this service, HG&E undertakes to supply, when available, the full requirement of the customer to the limit of the capacity of the installed service.
2. Interruptible Service: The amount of gas available at any time for customers under this classification is the portion of the total amount of natural gas, if any, available under HG&E's existing contract demand quantity, in excess of the amount of natural gas required to meet the demand of HG&E's firm gas customers. HG&E may curtail gas being supplied hereunder whenever the available supply of gas is insufficient to supply all of HG&E's requirements. HG&E will endeavor to give customers advance notice whenever a curtailment is required and the customer shall curtail the use of gas at the time and to the extent requested by HG&E. HG&E shall not be liable for any loss of production or for any damages whatsoever by reason of any such curtailment or because of the lack of advance notice.

Service under this schedule is not available for firm, standby, or supplementary purposes or space heating service or to any type of business or for any use where, in the opinion of HG&E, it is not feasible or safe to interrupt the deliveries of gas because of the customer's apparatus or equipment.

Such interruption will normally occur during the five (5) month winter period from November 1st thru March 31st of each year. However, the right of HG&E to interrupt service under this schedule shall not be limited to said period. It is the responsibility of the customer to provide HG&E with the current proper contacts for interruption notices.

In the event that a customer fails to discontinue use of gas under this schedule after notification by HG&E or uses gas during the five (5) month winter period between November 1st and March 31st without specific authorization by HG&E, then all gas consumed shall be paid for by the customer at the rate prescribed in the formal Rate Schedule. HG&E reserves the right to terminate gas service for continued failure to comply with interruption notices.

3. Firm Transportation Service:
  - a. This service is applicable to all gas purchased by a customer from a third party producer or marketer. The gas must be delivered to HG&E's distribution system via an interstate pipeline. Once HG&E has received the gas, HG&E will transport the gas to the customer's premises on a firm basis. This service is only available to those customers that execute a 12-month contract for the service provided herein.
  - b. Optional standby sales service is also offered under this rate. Customers opting not to purchase standby service shall have no right or claim to gas provided by HG&E.

- c. Daily and monthly balancing service is a part of this tariff and is mandatory to all customers on this tariff.
- d. As a provision for the balancing services, HG&E requires all transportation customers to have real time metering. The customer shall be responsible for and make direct arrangements for transmitting information to the Mueller Road Control Center via telephone lines or direct communication mediums such as copper or fiber. The customer shall be responsible for the cost of the equipment necessary to transmit the real time metering information along with the cost of the communication service. The telemetering equipment shall conform to the specifications of HG&E.
- e. This service provides for the firm transportation of third party gas delivered to HG&E on behalf of a customer. Under this service, HG&E will deliver such gas as received by the third party to the customer's burner tip. This transportation service is firm only to the extent that the third party gas is delivered to HG&E. This service is applicable only to customers which transport more than 2,000,000 ccf/year.

**Installations**

Before laying gas lines on any premises, the customer, or a tenant, may be required to obtain and file with HG&E, permission from the owner including an easement, if necessary, to lay the gas line and perform the installation.

Due to the unusual expense of excavating for gas line installation in frozen ground, rock, or other reason causing more than ordinary difficulty, HG&E will make a special agreement with the owners as to the price of the gas line installation.

HG&E shall apply for any necessary street permits and shall not be required to supply service until a reasonable time after such permits are granted. For all other necessary permits, the customer shall obtain rights at their expense.

- 1. Extension of Mains: HG&E may extend an existing gas main to serve a new customer if HG&E finds that the expense of such extension is warranted. Whenever the estimated income from a customer does not warrant the necessary expense of making service available to an applicant, HG&E will require a minimum monthly payment over a stipulated period of time, cash payment, or both, in order for HG&E to be assured of repayment for the investment necessary to supply such service.
- 2. Temporary Service: HG&E does not provide for temporary gas service. (In this connection, interruptible service is not to be construed as temporary service.)
- 3. New Gas Line: HG&E will install the first one hundred (100) feet of gas lines up to an outside riser or the first fitting inside the building, at no charge to the customer, if the indicated revenue for space heating or water heating is sufficient, in HG&E's opinion, for repayment of the investment necessary to supply such service. Otherwise, the customer shall pay to HG&E the expenses of installing the service from the property line to the building at the rate listed in Section 4 on the Application for New Gas Service.

HG&E reserves the right to determine the point of gas line entrances and the location of its equipment on the customer's premises. The customer is required to provide, maintain, and protect without cost to HG&E, suitable space for HG&E's equipment, which is required to be readily accessible to HG&E employees, safe from injury or damage, protected from the elements, and from access by any unauthorized person.

4. **Building Piping (New):** For ease of access and less future disruption, meters for new services will be located outside. If HG&E cannot determine a suitable outdoor location, the customer shall provide a location within 5 feet of the foundation wall for the meter. All piping downstream of the meter shall be done in accordance with the "Massachusetts Fuel Gas and Plumbing Code" (248CMR 1.00 - 7.00) by a "Qualified Installer" as defined in 248CMR 2.04 (2)(a) and 248CMR 4.00 of the Massachusetts code at the sole expense of the customer. This provision shall apply to buildings that previously had gas but the gas service was disconnected from the main due to inactivity.

HG&E shall either install the buried service line and leave provisions for a meter, meter bar, regulator bracket, or bank header, or, at its discretion, require customer piping be installed and inspected by the local authority prior to service installation. In such case, the building piping shall be extended by the customer to a point designated by HG&E and the customer shall be responsible for the final connection(s) from the meter outlet(s) to the customer pipe(s). HG&E or its authorized agent shall install all buried service lines.

HG&E may refuse gas service to any customer when, in the opinion of HG&E, the building piping does not meet the minimum standards prescribed by 49 CFR 190 - 199, CMR 220 and the "Massachusetts Code For Installation of Gas Appliances and Gas Piping." These regulations shall apply to any customer regardless of whether said customer is the owner of the building or a tenant.

5. **Repair or Replacement of Gas Service Lines and Interior Piping:** Any existing buried gas line or portion thereof found by HG&E to be no longer serviceable shall be replaced up to, at furthest, the connection to an outside meter or to the first interior fitting in the case of inside meters, at the expense of the HG&E. The replacement or repair of lines downstream of an outside meter-less riser, buried inter-wall or floor bend, or first interior fitting shall be performed at the expense of the property owner. Where practical, HG&E will repair inside leaks downstream of the first interior fitting at the expense of the property owner. Upon repair, HG&E shall determine if further work is required and provide cost estimates to the property owner for completing such work provided the work does not require a Gas Fitters license. If, in the opinion of HG&E, the interior piping after the first interior fitting and upstream of a meter or bank of meters is no longer serviceable, HG&E shall provide an estimate to relocate the meters outside of the building or to an interior location that is as close as practical to the service entrance. Whenever possible, the property owner will be given ample time to accept the estimate and have piping installed to the new meters or to make arrangements for other fuel sources. If, in the opinion of HG&E, the existing interior building piping either upstream or downstream of the meter or bank of meters cannot be safely repaired or an immediate hazard exists, the gas will be shut off and the

owner will be notified. Service lines that are not actively being used by a customer may not be renewed, be renewed or replaced solely at HG&E’s discretion.

- 6. Resale of Gas: All gas furnished by HG&E shall be used on the premises to which it is delivered. The customer shall not sell, assign, or otherwise directly or indirectly dispose of it to others, except through its inclusion in a fixed rent.
- 7. Service Upgrade: Customers upgrading equipment on their gas service must inform HG&E of the proposed changes. An existing gas line found to be too small for the proposed additional load will be replaced and the customer will pay for the cost of the upgrade unless the indicated increased revenue is sufficient, in HG&E’s opinion, for repayment of the investment necessary to supply such upgrade.

A minimum charge of \$300 or the actual cost of the upgrade, including overhead, will be charged for service line upgrades required for the installation of a stand-by generator or pool heater. This charge will also apply to customers that request a service line be moved to accommodate other construction on the property.

- 8. In the event of a gas moratorium or other extenuating circumstance that would restrict HG&E’s ability to supply natural gas service, HG&E reserves the right to deny service to premises requesting new natural gas service or an increase in connected gas load actively consuming gas. Additionally, premises with equipment not actively consuming gas within the previous twelve month period will not have gas service restored or such inactive lines renewed and/or replaced. For connected equipment not currently active, HG&E reserves the right to discontinue service to that component. Locations found to violate the terms of the moratorium will be subject to gas service disconnect.

**Gas Metering**

Gas meters shall be furnished and installed by HG&E at locations designated by HG&E. HG&E shall determine the type and size of the meter. Meters shall be so located as to permit ease of reading, maintenance, and accessibility. Keys shall be required from the property owner where meters are located in a secure location. If keys are not submitted to HG&E within a reasonable timeframe, HG&E reserve the right to enter the secure location and bill the property owner as required.

The customer must permit regular access to meters for the purpose of reading, inspection, and/or leak surveying at reasonable hours of the day. The owner of any building that undergoes a substantial rehabilitation or heating system replacement shall re-pipe all appliances or living unit feed pipes to a new meter or bank of meters located outside or as close as practical to the service entrance, at a location determined by HG&E.

All meters and other materials and appliances installed in the customer’s premises at the expense of HG&E are to be and remain the property of HG&E and may be removed by HG&E whenever service is discontinued for any reasons.

Gas meters are required to be replaced every seven (7) years as stated in Mass General Laws, Chapter 164, Section 115A. HG&E will make every effort to accommodate customers’ availability when attempting to replace a gas meter.

**Customer Gas Equipment**

No customer shall be allowed to connect or operate appliances if, in the judgment of HG&E, the use of such appliance or equipment will result in a lowering of the quality of service to a nearby customer.

No new or replacement appliance shall be connected which, in the opinion of HG&E or its agents, is not properly equipped with approved safety devices in good working order, as prescribed by a nationally recognized testing agency, such as the American Gas Association or Laboratories and Underwriters’ Laboratories, Inc., or if the equipment does not comply with the “Massachusetts Code for Installation of Gas Appliances and Gas Piping”.

Existing equipment that, in the opinion of HG&E or its agents, is not properly equipped with approved safety devices in good working order, as prescribed by a nationally recognized testing agency, such as the American Gas Association or Underwriters’ Laboratories, Inc., or if the equipment does not comply with the “Massachusetts Code for Installation of Gas Appliances and Gas Piping” shall be turned off by HG&E in order to prevent their operation until such time they can be operated safely.

**Appliance Repair Policy**

HG&E services and repairs the following appliances for a fee at the customer's premises:

- |                               |                                  |
|-------------------------------|----------------------------------|
| Boilers (Gas)                 | Hot Water Heaters (Gas/Electric) |
| Furnaces (Gas/Electric)       | Ranges (Gas/Electric)            |
| Clothes Dryers (Gas/Electric) | Room Space Heaters (Gas)         |
| Gas Fired Incinerators (Gas)  | Unit Heaters (Gas)               |

HG&E, at its discretion, may also service and repair other customer equipment as qualifications allow. HG&E also services some commercial and industrial gas-fired equipment except gas-fired pilots for oil burning furnaces. HG&E charges for the labor, parts, and materials used in the repair of customer equipment and appliances according to the approved service fee schedule.

**Sale of Appliances**

HG&E does not sell any appliances.

**Gas Leaks**

Any gas leak or suspected gas leak should be immediately reported to HG&E. Upon receiving a complaint of a gas leak, a qualified HG&E representative will be dispatched to investigate.

**HG&E’s 24-hour emergency number is (413) 536-9300.**

## Section Three: Electric

### Classifications of Electric Service

All services, temporary or permanent, including such services disconnected for any reason for at least six (6) months, must be inspected and approved by the local wiring inspector before HG&E will connect such services to its system. HG&E will determine whether a service is to be supplied overhead or underground and the exact location of the service entrance and metering. HG&E, at its discretion, may reimburse a customer for relocating any backyard, alleyway, or inaccessible service to the street. A Request for Service form must be submitted before any service can be reviewed by engineering. No service will be energized without receiving a properly completed Request for Service form. Any and all plans for service must be approved by HG&E prior to final design and construction. Any construction performed prior to obtaining HG&E approval is subject to revision. **As required, appropriate easements must be obtained prior to installation of new or relocated facilities.** A written cost estimate, sufficient to justify all expenses to be charged to a customer, shall be provided to the customer upon request.

1. Temporary: Temporary service is a service that will not continue for a sufficient period of time to justify a permanent service. For such service, the customer's electrician must provide a means of attachment for wires to install a fused switch, meter socket, and driven ground according to the NEC.

Temporary construction requiring more than a 125-foot extension of low voltage conductor or the installation of conduits, poles, high voltage lines, transformers, etc. shall be at the customer's expense. Temporary service extensions, which are to be used later for permanent service, shall not be charged to the customer except insofar as the customer is otherwise liable as part of the permanent service.

Energy consumed shall be billed at the appropriate rate. A temporary service shall be disconnected as soon as possible. An installation charge of \$200.00 shall be required for each temporary service required and must be paid prior to connection.

It is the customer's responsibility to notify HG&E when temporary service is to be discontinued, typically within one year. All electric service will be discontinued at that time.

2. Permanent – Overhead: Overhead service will be installed to only one (1) point on any building at no cost to the customer, subject to distance and height limitations. More than one (1) connection point is at the sole discretion of the local wiring inspector and final approval of HG&E. HG&E will determine the point(s) of attachment of its wires to any structure. The point(s) of attachment must be located such that the clearances specified in Article 230-24 of the latest version of National Electrical Safety Code (NEC), can be maintained. HG&E will maintain the service to such point of attachment and assumes no responsibility beyond it.

An overhead service, which is more than 125 feet from an existing electric pole, may require the installation of a pole and additional time to schedule. This pole will be installed by HG&E at no cost.

Additional poles and facilities beyond this pole will be at the customer’s expense. Extensions of distribution facilities installed by HG&E at the customer’s expense because of distance limitations shall become the property of HG&E when connected to its lines and HG&E shall maintain them. Replacement of those poles and facilities beyond 125 feet may be at the customer’s expense depending on annual energy revenues and other factors determined appropriate by HG&E.

The maximum single-phase service from an overhead distribution system is 400 A, including the total rated capacity for multiple main switches, unless otherwise approved by HG&E.

3. Permanent – Underground: Underground service will be installed to only one (1) point of entry on any building unless otherwise approved by both the local wiring inspector and HG&E. HG&E will determine this point of entry and maintain all services to such point of entry, except as elsewhere stated, and assume no responsibility beyond it.

An underground residential service conductor extension that is more than 125 feet from an existing electric junction point shall be at the customer’s expense except as otherwise stated. Extensions of distribution facilities installed by HG&E at the customer’s expense because of distance limitations shall become the property of HG&E when connected to its lines and HG&E shall maintain them.

Commercial and industrial customers are responsible for the installation of their underground service to a location designated by HG&E.

The maximum single-phase service from an underground distribution system is 800 A, including the total rated capacity for multiple main switches, unless otherwise approved by HG&E.

Secondary Installation: The customer must provide a trench no less than 24” deep from the service entrance to a HG&E designated electric pole or underground junction point. If it is necessary, HG&E will dig the trench and bill the customer as required.

The customer is to install HG&E approved conduit for all secondary conductors on private property. HG&E will designate the size and number of conduits including spares that is required. The following serves as a guide to these minimum requirements; however, the customer must contact HG&E prior to commencement of work. Generally, a single 3” minimum electric grade, schedule 40 PVC conduit will be used to connect an underground service lateral and a separate 2” minimum electric grade, schedule 40 PVC conduit stubbed approximately 6” above grade at the service location. For connection to the overhead system, a 3” schedule 80 PVC conduit will be used with a twenty-four (24) inch radius sweep to the pole and continue to a point ten (10) feet up the pole. Exposed conduit and a minimum twenty-four (24) inch radius sweep at the meter shall be schedule 40 PVC with a slip joint except when the meter is located in a vehicle accessible area where schedule 80 PVC shall then be required.

Primary installation: The customer must provide a trench no less than 30" deep from a padmounted transformer or cabinet to a HG&E designated electric pole or underground junction point. If it is necessary, HG&E will dig the trench and bill the customer as required.

A total of two (2) four 4" minimum electrical grade schedule 40 PVC conduit is required. Where installation is accessible to vehicle traffic, HG&E will make the determination on whether to use steel, schedule 80 PVC, or DB120 conduit or stronger encased in concrete for conduit installations. When service is from a pole, the customer must provide conduit for primary conductors from a point ten (10) feet up the pole to the transformer. Exposed conduit and a minimum twenty-four (24) inch radius sweep at the pole shall be schedule 80 PVC.

At the interchange between HG&E's and customer's conductors, HG&E will make the secondary connections at HG&E's expense and will supply the connectors for services 400 A or less. Multiple or larger connectors, when required, shall be provided by the customer and installed by HG&E. The customer shall leave sufficient length of cable for HG&E to make proper connections to the transformer. In no case shall conductors have less than a thirty-six (36) inch lead. The customer will be responsible for the placing of holes for the conduit entrance in the foundation, sealing of conduits where they enter the building, maintaining and repairing such conduit entrance area, and, depending on the particular location, the customer may be required to install any conduit and cabling through the building entrance and inside the building.

When, with HG&E's approval, service conductors terminate in a main switch, the customer shall provide the connectors and pay for all materials and labor that is required more than three (3) feet inside the building.

The following general rules apply where the service requires an individual transformer. Special circumstances may require HG&E at its discretion to modify the requirements of each party.

- a. The customer will supply all primary conduits, manholes/handholes, and other underground structures on private property per HG&E specifications.
- b. The customer will supply a transformer pad (vault) and ground grid constructed to HG&E specifications.
- c. The customer will provide all trenching, conduit, and restoration on private property and may be required to do so in the public way depending on project requirements.
- d. For all services greater than 400 A, the customer will supply all secondary services, including conductors, conduit, and connectors, from HG&E mains to the customer's service entrance. The customer's service begins at the transformer secondary terminals and these services are the property of the customer and are not maintained by HG&E.
- e. The customer will supply excavation for manholes/handholes, where required.
- f. HG&E will supply the primary conductors.
- g. HG&E will supply the transformer(s).

It is important that HG&E be notified of service requirements as early as possible due to long delivery times in obtaining certain materials necessary to supply service to large customers.

Underground distribution will be installed in all new residential subdivisions. It will be the responsibility of the developer and/or property owner to provide adequate lot line and grade markers and obtain proper easements required to receive electric service. The developer and/or property owner shall also pay for the installed cost of the infrastructure which shall include an adequate amount of street lighting as determined by HG&E. Underground lines cannot be installed until the site is sub-graded to within six (6) inches of finished grade and water and sewer utilities are installed. Plot plans must be submitted to HG&E prior to construction for electrical layout and design. No service will be provided without HG&E approval.

4. **Emergency:** Emergency backup service will be provided only under unusual circumstances; such as where it is necessary for public health or safety or in the case of longer than normal power outages. When the customer specifically requests such service, the customer shall be responsible for the entire cost of providing this service and thereafter for applicable monthly costs under the Standby Facilities Clause. HG&E will not guarantee to dedicate this emergency service to the customer and it may not always be possible to provide such service.
5. **Relocation or Covering:** Whenever electric lines, including any and all overhead or underground facilities, must be relocated or covered for the convenience of the customer and such relocation or covering involves more than one (1) hour of labor or it involves materials not normally carried on a line truck, HG&E shall bill the customer actual cost of the material and any labor beyond one (1) hour. Any lost or damaged material shall be billed to the customer.
6. **Protection of HG&E Equipment:** The customer shall furnish and maintain, at no cost to HG&E, the necessary space, housing, fencing, barriers, and foundations for the protection of the equipment to be installed upon the customer's premises, whether such equipment is furnished by the customer or HG&E. If the customer refuses, HG&E may at its option charge the customer for furnishing and maintaining the necessary protection of the equipment. Such space, housing, fencing, barriers, and foundations shall be in conformity with applicable laws and regulations and subject to HG&E specifications and approval.

## **Voltage**

Standard single-phase three wire secondary services are supplied at either 120/240 volts or 120/208 volts depending on location and character of load. Standard three-phase four wire secondary services include 208Y/120 volt or 480Y/277 volt. HG&E decides which voltage is available depending upon the location.

Six hundred volt service will not be supplied to new locations or to locations where service at this voltage has previously been removed. HG&E reserves the right to discontinue 600 volt service by supplying transformers to the customer to allow the customer to convert a standard voltage to 600 volts.

Three-phase, three wire, delta services (240, 480, or 600 volts) are no longer offered. Any changes or additions to existing delta services shall only be made with the approval of HG&E.

Primary service can be supplied at 13.8 kV or 34.5 kV as available and at the discretion of HG&E.

In accordance with the latest versions of the National Electric Code (NEC) and Massachusetts Electrical Code (MEC), there shall be only one (1) service of any one (1) voltage to each building except by special permission of the local wiring inspector. More than one (1) voltage characteristic may be supplied to each building at the discretion of HG&E. Firewalls meeting applicable safety code requirements shall be considered separate buildings.

### **Electric Metering**

1. Installation: Electric meters will be furnished and installed by HG&E at locations to be designated by HG&E. HG&E shall determine the sizes, types, and quantities of meters. HG&E may at any time change any meter previously installed. The customer shall be responsible for furnishing and installing, as directed, the appropriate meter socket(s). Meter sockets shall be placed outside when a service is changed or upgraded unless otherwise approved by HG&E. HG&E reserves the right to temporarily shut off service to any customer whose meter socket is in poor condition and/or is a safety hazard to our personnel until it is repaired or replaced. The customer shall also be responsible for providing an instrument transformer enclosure of the approved type when required. Mounting of instrument transformers are performed by the electrical contractor; wiring by HG&E.

Should a customer request a new meter or request that a communication device be attached to the existing meter, HG&E shall provide, install, test, and maintain the meter and/or communication device. The requested meter and/or communication device must meet HG&E's requirements. The customer shall bear the cost of providing and installing the meter and/or communication device. Upon installation, the meter and/or communication device shall become the property of the HG&E and be maintained by HG&E. HG&E shall bill the customer upon installation.

Wherever primary metering is employed, HG&E will allow a 2% discount on consumption to compensate for losses and transformer ownership. If a customer requests HG&E to own and maintain transformers under a primary metering application, then HG&E will allow a 1% discount on consumption to compensate for losses. If transformers are owned by the customer under a secondary metering application, HG&E allows a 1% discount in addition to the 10% prompt payment discount on the monthly bill. The primary metering and transformer discounts do not apply to the Large General Service rate schedule, as this rate is provided at primary not secondary voltage. With the exception of those customers grandfathered by previous contracts, HG&E will assume no responsibility beyond the metering point; therefore, the customer must also own the transformers needed to step voltage down to the utilization voltage(s). HG&E reserves the right to hold a customer responsible for a primary metered service once an existing electric account has changed names. Primary metering is not normally used for loads under 1000 kVA.

All three-phase 480Y/277 volt services and those services fed off the 216Y/125 volt network shall be installed as “cold sequence” (main disconnect is ahead of the meter) and all other self-contained single-phase or three-phase 208Y/120 volt secondary metered services shall be installed as “hot sequence” (meter is ahead of the main disconnect) unless otherwise allowed by HG&E.

In multiple dwellings, meter sockets shall be permanently marked before the meter is set to identify the apartment, area, or load to be measured by each meter.

Detailed information on any individual installation can be obtained from the HG&E Meter Department. Meters may not be removed and/or the seal broken without prior permission. If done so, the customer may be subject to labor and material charges associated with installing new meters and/or seals as well as estimated billing for any usage not recorded and possible criminal charges for meter tampering.

2. Location: Electric meters shall be located to provide, and continue to provide, ease of reading, maintenance, and accessibility. Meters will not be allowed in locations where, in the opinion of HG&E, they are likely to be damaged and/or difficult to read and/or inaccessible. Keys shall be required from the property owner where meters are located in a secure location. If keys are not submitted to HG&E within a reasonable timeframe, HG&E reserves the right to enter the secure location and bill the property owner as required. Unless unusual circumstances exist, meters will be located outdoors. The top of these meters shall not be more than six (6) feet from ground level and the bottom of the meter not less than three (3) feet from ground level unless approved otherwise by HG&E.
3. Sub-Metering & Check Metering: The resale of electricity furnished by HG&E, based on the registration of customer owned metering devices, is defined as sub-metering and is not permitted. A customer may monitor his own usage through the use of approved meters, computers, or other metering devices. Such metering is defined as check metering.
4. Diversion & Meter Tampering: When HG&E discontinues the supply of electricity, it may seal such service and meter switch by padlocking, replace the plug-type fuses with blank or “dummy” fuses, or remotely disconnect service to prevent the continued supply of electricity. If a customer receives unmetered service as a result of any tampering with the meter or other HG&E equipment, HG&E shall take appropriate action including, but not limited to, making changes in the meter or other equipment and rebilling the customer. The customer will be held responsible to HG&E for any use of electricity that occurs beyond the point of the meter installation. A customer may also be subject to criminal and civil penalties pursuant to the Massachusetts General Laws, Chapter 164 and applicable DPU regulations for tampering with this equipment.
5. Demand/Reactive Usage Requirement: HG&E determines when a reactive reading shall be obtained for the purpose of determining power factor and when a demand reading shall be obtained for either billing and/or engineering purposes. At a minimum, all accounts with monthly average consumption over 15,000 kWh for at least three (3) consecutive months shall have both.

6. **Power Factor Clause:** A customer must maintain a minimum average power factor of 85% for any given month unless otherwise stated within a customer's rate schedule (i.e., Large General Service is 95% level). Power factor shall be reviewed from both a lagging and leading perspective from unity. Should a customer fail to maintain the applicable power factor, no eligible prompt payment discount or other special discounts will be allowed for that month. If a customer agrees to take prompt corrective action to correct the problem, the discount will be allowed for a maximum of four (4) consecutive months including the month of the original occurrence to allow time for the customer to correct the problem. If the customer does not agree to take corrective action or if the four (4) months have elapsed from the time of the original occurrence, the discount will be allowed only when actually earned. A customer will not be granted another grace period until twenty-four (24) months have passed since the end of the previous grace period unless the customer is a new account holder for that electric service. Customers with kVARh metering who are making a significant change in their load are expected to assess, in advance, the needed correction. HG&E may allow "reasonable time" during testing or commissioning period to avoid problems that can arise during this time. Also, HG&E may, upon case by case review, allow a discount when the applicable power factor is not maintained during a maximum six (6) month period of either ramp up or winding down of a customer's operations.
  
7. **Communications:** For large accounts above 100 kW, HG&E may require customers, at their expense, to provide a direct communications medium such as copper or fiber to access meters remotely.

### **Customer Electric Equipment & Wiring**

Wiring installed on the customer's premise must conform to all applicable requirements of HG&E and the NEC as amended by the MEC. Wiring shall be inspected and approved by the local wiring inspector, acceptable to HG&E, prior to connection of new service.

No customer shall be allowed to connect or operate equipment, including electric generators, if such equipment results in lowering the quality of service supplied to nearby customers or causes safety problems on HG&E lines. In cases of this type, HG&E may disapprove the use of the equipment or may designate the conditions or times when it may or may not be used. These instructions shall be followed strictly or the service may be discontinued.

The responsibility of HG&E normally ends at the point of attachment of the customer's dwelling. HG&E assumes no responsibility for damage caused by the customer's equipment. HG&E shall permit electrical contractors, licensed by the State of Massachusetts, to cut and reconnect 120/240 volt, three-wire single-phase overhead residential services of 400 amps or less at the weatherhead to expedite work requested by customers. Failure to follow the procedures provided herein may result in additional corrective work and expense for the electrical contractors including any corrective work performed by HG&E. Electrical contractors shall be responsible for obtaining the appropriate permits from the local wiring inspector. Customers and/or contractors shall refer to the HG&E Information and Requirements for Electric Service for further detailed information.

**Homeowners are not authorized to cut and reconnect electric services.** An electrical contractor must hold an A license issued by the Commonwealth of Massachusetts or work in the capacity of an Electrical Apprentice under

the direct supervision of a licensed electrician of an A license. Under this condition, physical work may be performed; however, the permit must be obtained by the licensee who is responsible for the work at the location.

The electrical contractor, its employees, and those under its control shall perform all work as independent contractors and shall not be deemed to be employees or agents of HG&E for any purpose. HG&E shall not be liable for direct, indirect, or consequential damages of any kind whether resulting from injuries to persons or property or otherwise arising out of an electrical contractor’s work.

Where conditions require transformers to be on private property, the customer shall, if requested, provide and maintain a suitable vault, pad, or structure.

The customer shall maintain and operate its electrical equipment and appliances so as not to endanger or interfere with the service of HG&E. The customer shall utilize the electrical power under these Rules and Regulations such that the current in any ungrounded conductor shall not at any time vary more than 5% from the current in each of the other ungrounded conductors when measured at the place of delivery per IEEE 519. Voltage harmonic levels shall not exceed 5% on a regular basis with only rare conditions when this value is exceeded.

**Motors**

All motors over ½ horsepower (H.P.) operating on single-phase services must be connected for 240 volts. Motors of 3 H.P. and above shall be three-phase except in a network voltage area where 5 H.P. single-phase motors may be allowed. Exceptions to these conditions require HG&E approval prior to installation or use. HG&E reserves the right to require reduced voltage or reduced load starting to be installed on customer equipment when it deems necessary.

Before purchasing special equipment or before making substantial changes in load, the customer should consult with HG&E representatives. The capacity of existing service and the voltage and phase of available service should be determined prior to the purchase of new equipment. HG&E will provide information on available service when requested.

Chapter 25 of the Revised Ordinances of the City of Holyoke and NEC, as amended by the MEC, further regulates electrical wiring.

The customer shall obtain approval from HG&E prior to connecting any motor larger than indicated below:

- a. 3 H.P. for single phase, secondary service up to 600 volts.
- b. 15 H.P. for three phase, secondary service up to 600 volts.
- c. 75 H.P. for three phase, primary service of either 13.8 kV or 34.5 kV.

**Contract Lighting**

Contract lighting is available for a period of not less than one (1) year under a filed rate schedule. In the event of vandalism, HG&E reserves the right to remove any light fixture from service or, upon request from the

customer, replace any damaged fixture(s) beyond the standard rate provided within the filed rate schedule by purchasing a vandal-proof lens or other remediation at actual cost.

### **Surge Protection**

Surge protection is available for a period of not less than one (1) year under a filed rate schedule. In the event of vandalism and/or tampering, HG&E reserves the right to remove any surge protection device from service.

### **Connection Charges – New Service**

1. Connection charges will be based on actual costs subject to HG&E requirements stated within the Classification of Electric Service section herein. Estimates will be provided to the customer in advance and at least 50% of the estimate shall be paid up front with the balance paid upon completion.
2. Implementation: Payment for the above will be based on approved plans submitted to the appropriate local authorities and must be made to HG&E before construction service is installed by HG&E.
3. Waiver: Connection charges may be waived in lieu of taking Special Programs in effect from time to time.

### **Alternate Electric Energy Sources**

1. Non-Parallel Generation (Standby or Emergency): When a customer installs emergency generation, an adequately sized double-throw disconnecting device must be provided by the customer to open all ungrounded conductors from the normal supply before connection is made to the emergency supply, in accordance with the requirements of the NEC, as amended by the MEC.
2. Parallel Generation: Subject to certain requirements, HG&E will permit parallel operation of generating equipment with the system. In general, automatic synchronizing must be provided by the customer together with the automatic prevention of any feed into HG&E de-energized system. The customer must contact HG&E early in the planning process and receive written approval. Standby Facility charges may apply. (See Distributed Generation Interconnection Policy & Application and Distributed Generation Purchase Power Clause for specific rates, terms, and conditions.)
3. Uninterruptible Power Supply: HG&E will not own, install, or operate any UPS equipment. A customer installation must provide automatic prevention of any feed into HG&E system. The customer must contact HG&E early in the planning process and receive written permission.
4. Distributed Energy Resources: Any customer installing a distributed energy resource (i.e. solar, hydro, storage battery, etc.) must fill out an Application for Interconnection. The application must be completed in full and project reviewed and approved by HG&E prior to the start of work. Specific requirements may vary and should be acknowledged and understood prior to the start of work. (See

Distributed Generation Interconnection Policy & Application and Distributed Generation Purchase Power Clause for specific rates, terms, and conditions.)

### **Power Outages & Concerns**

All power outages or suspected electric concerns should be immediately reported to HG&E. Upon receiving concerns, an HG&E representative will be dispatched to investigate. HG&E outage map and any applicable emergency notifications can be found on our website.

**HG&E's 24-hour emergency number is (413) 536-9300.**

**OFF-STREET/CONTRACT LIGHTING**

**AVAILABILITY**

This service is available for general area lighting and security purposes only.

**RATE-APPLIED MONTHLY**

Light Type	Monthly kWh	
60 W Area LED	21.58	\$ 9.50
49 W Roadway LED	17.56	\$ 8.75
92 W Roadway LED	33.25	\$11.75
183 W Roadway LED	65.80	\$18.50
85 W Flood LED	30.56	\$15.00
129 W Flood LED	46.39	\$20.00

LED = Light Emitting Diode

Renewable Energy Charge at \$0.00050 per kWh (Not subject to any discounts.)

**Pole Charge**

Wood Pole	\$6.50
Non-Wood Pole	\$14.00

The above pole charge will be applied to the foregoing lamp charges where the Department is requested to furnish a suitable pole, for the sole purpose of supporting a light fixture. If at a future date the pole is used for any purpose approved by the Department in addition to supporting a light fixture hereunder, the pole charge will be terminated.

**DISCOUNT**

No discount applies to off-street & contract lighting.

**TERMS AND CONDITIONS**

The above rate include the cost of overhead wires, light fixture, lamp, a control of the time of use, normal labor, and electricity. All repairs shall be made during normal working hours within 3 business days after notification from customer. Easements or right-of-entry releases, if required, will be provided at no cost to the Department.

The above rates do not include an underground supply, anchor guy, control switch, or a special light fixture requested by the customer. The cost of material and labor for anything other than a normal construction will be paid for by the customer.

This contract shall be for one (1) year and then cancelable on thirty (30) days notice subject to, if a pole was required, a termination charge equal to \$450 for a wood pole or original installed cost of a non-wood pole less the total accumulated monthly pole rental charges received to date shall apply. If a light fixture is to be used for a period of less than one (1) year, then a \$60.00 fee will apply.

Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts", in effect from time to time, where not inconsistent with any specific provisions hereof.

Filed February 11, 2021

Effective March 11, 2021

## **STANDBY FACILITIES CLAUSE**

### **AVAILABILITY**

This clause will be applicable to all electric rate schedules where customer receives backup or supplemental service from the Department due to the customer's use of on-site generation ("Generation Charge") or receipt of redundant facilities ("Wires Charge"). Charges under this clause are in addition to other applicable rate schedules.

### **GENERATION CHARGE**

A Generation Charge shall be applied to all partial requirements customers who self-generate all, or a portion of, the customer's electrical power service requirements on a regular basis. This Generation Charge is intended to provide the customer with a backup supply of power when the customer's generating facilities are not in operation or are operating at less than full rated capability. Customers who have generation capabilities for emergency purposes only (run less than 5% of time) shall not be accessed this generation charge, however are still required to file data with Department.

Facilities Charge:     \$ 3.35 per nameplate kW/month  
Existing Hydro resources shall receive a \$1.30 credit per nameplate kW/month or as otherwise amended based on applicable Water Use Agreements.

Service taken under this rate shall be electrically separated from the customer's generating facilities or provided with sufficient protective devices to prohibit such facilities from causing disturbances on the Department's system consistent with the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts." The Department reserves the right to conduct audits for verification, to place appropriate metering within customer facilities, and to refuse service to facilities where the Department reasonably determines that the protection provided is inadequate.

Qualified Distributed Generation (DG) Facilities will not be subject to a Standby Facilities Generation Charge as set forth in "Distributed Generation Purchased Power Clause".

### **WIRES CHARGE**

A Wires Charge shall be applied to customers who receive redundant facilities from the Department. This Wires Charge is intended to provide the customer with increased reliability of service and/or restoration time by having additional facilities supplied to customer. Redundant Cabling charges include primary and/or secondary facilities provided in duplicate to customer, while Complete Backup Facilities includes a redundant backup source provided by a second transformer at customer's location. Line construction, if any, is subject to the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

**Mass. DPU No. 222E**  
**Replaces Mass DPU No. 192E**

Facilities Charge:	Redundant Cabling	\$ 15.00/month
	Complete Backup Facilities	
	- From Same Substation	\$ 0.330/kVA/month
	- From Different Substations	\$ 0.720//kVA/month
	(kVA equals ½ of the total nameplate capacity of transformers serving customer)	

**DISCOUNT**

No prompt payment discount applies. Interest will accrue at 1.5 percent per month on the unpaid balance.

**TERMS AND CONDITIONS**

Service is governed by the “Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts.”

Filed July 16, 2021

Effective July 12, 2021

**LARGE INDUSTRIAL CONTRACT SCHEDULE**

**AVAILABILITY**

Service under this schedule is available to industrial users who are primarily engaged in manufacturing who have executed a long term contract, having a minimum monthly demand of 115 kW and a minimum monthly consumption of 40,000 kWh.

**RATE - APPLIED MONTHLY**

<u>Charges</u>	<u>2022</u>	<u>2023</u>	<u>2024</u>	<u>2025</u>	<u>2022</u>	<u>2023</u>	<u>2024</u>	<u>2025</u>
<b>Customer</b>	\$380.00	\$380.00	\$380.00	\$380.00

<b>Transmission</b>	0.02233	0.02266	0.02300	0.02335				
<b>Renewable Energy</b>	0.00050	0.00050	0.00050	0.00050				

**DEMAND**

The demand charge will be the highest thirty-minute average demand during the billing period.

**DISCOUNT**

A prompt payment discount of 10% applies for payments received within 15 days of billing, provided power factor is not less than 85%. No discount applies to the Renewable Energy charge.

**RATE ADJUSTMENTS**

The rates shown above will be in place for monthly billing cycles that begin from January 1, 2022 through December 31, 2025. Rate changes will occur in first billing cycle after January 1<sup>st</sup> of each year and remain in effect through December billing cycle of each year.

**TERMS AND CONDITIONS**

Bills are due and payable 30 days after date of billing. Service is governed by the “Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts”.

Filed December 10, 2021

Effective January 11, 2022

**RESIDENTIAL**  
**ELECTRIC SCHEDULE**

**AVAILABILITY**

Service under this schedule is available for all residential purposes in an individual private dwelling or an individual apartment.

**RATE - APPLIED MONTHLY**

Customer Charge      \$5.55 per meter

All kWh at \$0.14072 per kWh

Renewable Energy Charge at \$0.00050 per kWh (Not subject to any discounts.)

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**PURCHASED POWER ADJUSTMENT**

There shall be an adjustment in rate due to cost of power as provided in the Department's Standard Purchased Power Adjustment Clause in effect from time to time.

**HYDROELECTRIC POWER ADJUSTMENT**

There shall be an adjustment in the rate due to power purchased from the Niagara hydroelectric projects provided in the Department's Hydroelectric Power Adjustment Clause in effect from time to time. This reduction in rate may be further adjusted based on Department's owned hydroelectric facilities, at the discretion of the Department from time to time. For billing purposes, this Hydropower Reduction may be combined with and reflected in the Purchased Power Adjustment.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

Filed November 16, 2022

Effective January 11, 2023

## SMALL INDUSTRIAL SCHEDULE

### AVAILABILITY

Service under this schedule is available to small industrial users receiving three-phase electric services who are primarily engaged in manufacturing subject to meeting the following two conditions:

- 1) monthly demand of less than 115 kW or monthly consumption of less than 40,000 kWh; and
- 2) monthly consumption of greater than 16,000 kWh.

### RATE - APPLIED MONTHLY

Customer Charge      \$20.00 per meter.

Energy Charge          First 3000 kWh at \$.14443/kWh  
Next 12,000 kWh at \$.14047/kWh  
All over 15,000 kWh at \$.12694/kWh

Renewable Energy Charge at \$0.00050 per kWh (Not subject to any discounts.)

### DISCOUNT

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill and provided that no discount will be allowed to customers having a power factor less than 85%.

### PURCHASED POWER ADJUSTMENT

There shall be an adjustment in rate due to cost of power as provided in the Department's Standard Purchased Power Adjustment Clause in effect from time to time.

### BACK-UP POWER

Customers who have on-site generation to meet some of their own load requirements shall be subject to a facilities charge as provided in the Department's Standby Facilities Clause in effect from time to time.

### TERMS AND CONDITIONS

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

Filed November 16, 2022

Effective January 11, 2023

**COMMUNITY SHARED SOLAR RESIDENTIAL  
ELECTRIC SCHEDULE**

**AVAILABILITY**

Service under this schedule is available for all residential purposes in an individual private dwelling or an individual apartment, who have chosen to participate (opt-in) in the Community Shared Solar Program (Program).

**RATE - APPLIED MONTHLY**

Customer Charge        \$5.55 per meter

All kWh at \$0.14072 per kWh

Renewable Energy Charge at \$0.00050 per kWh (Not subject to any discounts.)

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**PURCHASED POWER ADJUSTMENT**

There shall be an adjustment in rate due to cost of power as provided in the Department's Standard Purchased Power Adjustment Clause in effect from time to time.

**HYDROELECTRIC POWER ADJUSTMENT**

There shall be an adjustment in the rate due to power purchased from the Niagara hydroelectric project provided in the Department's Hydroelectric Power Adjustment Clause in effect from time to time. This adjustment in rate may be further adjusted based on Department's owned hydroelectric facilities, at the discretion of the Department from time to time. For billing purposes, this Hydropower Adjustment may be combined with and reflected in the Purchased Power Adjustment.

**COMMUNITY SHARED SOLAR REDUCTION**

The cost per KWH for all energy will be adjusted due to the purchase by the Department of power from the Community Shared Solar Generation Unit(s). The savings in cost per KWH will be determined by computing the savings in energy costs and dividing by the concurrent KWH sold to the residential customers participating in the Program. The credit applied will be adjusted upward or downward from time to time such that the savings in power costs will accrue entirely to the Department's residential customers who have opted in to the Program.

This Program is structured to meet the eligibility criteria established under the Department of Energy Resources (DOER) regulations defined in 224 CMR 14 and shall be in effect for a minimum of ten years from the commencement of operation of the Community Shared Solar Generation Unit(s). At such expiration or termination of this schedule, all customers then enrolled in this schedule will be moved to the applicable residential electric schedule in effect at that time.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

Filed November 16, 2022

Effective January 11, 2023

**GENERAL SERVICE  
ELECTRIC SCHEDULE**

**AVAILABILITY**

Service under this schedule is available for commercial, industrial, municipal and multiple apartment dwelling customers for both light and power.

**RATE - APPLIED MONTHLY**

Customer Charge: \$7.40 per meter

First 200 Hrs. Times Demand	
First	3,000 kWh at .14443 per kWh
Next	12,000 kWh at .14047 per kWh
Next	85,000 kWh at .14004 per kWh
All over	100,000 kWh at .13215 per kWh

Next 200 Hrs. Times Demand (100 KW Minimum) at .12400 per kWh

All over 400 Hrs. Times Demand (100 KW Minimum) at .10481 per kWh

Renewable Energy Charge at \$0.00050 per kWh (Not subject to any discounts.)

**AGRICULTURE/FARMING**

Persons or corporations engaged in the business of agriculture or farming, as designated by the Commonwealth of Massachusetts, shall receive a discount of 10% from the rates shown above (prior to the prompt payment discount).

**INDOOR CULTIVATION**

Persons or corporations primarily engaged in the business of indoor cultivation, who provide verification documentation to the Department, shall receive a discount of 10% from the rates shown above provided and conditioned each month that they have a monthly load factor of 65% or greater (prior to the prompt payment discount). This discount is ineligible if receiving Agriculture/Farming discount. Customers must meet the requirements in Discount section (power factor and prompt payment) below in order to qualify for indoor cultivation discount.

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill and provided that no discount will be allowed to customers having a power factor less than 85%. No economic development discount (EDD) shall apply per Mass DPU 191 G/E to any customers on the Agriculture/Farming or Indoor Cultivation special rates.

**PURCHASED POWER ADJUSTMENT**

There shall be an adjustment in rate due to cost of power as provided in the Department's Standard Purchased Power Adjustment Clause in effect from time to time.

**BACK-UP POWER**

Customers who have on-site generation to meet some of their own load requirements shall be subject to a facilities charge as provided in the Department's Standby Facilities Clause in effect from time to time.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

Filed November 16, 2022

Effective January 11, 2023

**SCHEDULE 3 – ELECTRIC RATE  
CITY OF HOLYOKE  
GAS & ELECTRIC DEPARTMENT**

**Mass. DPU 231E  
Replaces Mass. DPU 226E**

**LARGE GENERAL SERVICE CONTRACT SCHEDULE**

**AVAILABILITY**

Service under this schedule is available to all commercial and industrial customers who have executed a long term contract, have a minimum monthly demand of 2,700 kW and a minimum monthly consumption of 1,675,350 kWh. The average monthly load factor shall also be no less than 85%. Failure to maintain these minimum requirements is covered by Section 1.4 of this Agreement.

**BASE RATE - APPLIED MONTHLY**

Customer Charge	\$500.00
<b>Consumption</b>	
<b><u>\$/kWh</u></b>	
Energy Only	0.04175
Energy Other	0.01298
Distribution	0.01527
Transmission	0.01913
Renewable Energy	0.00050

**POWER FACTOR CHARGE**

An additional charge of \$.001 per kWh will be added to bills in any month where a lagging or leading power factor, as applicable for such month, of 95% is not maintained. This charge shall increase by an additional \$.001 per kWh for each 10% level below that of 95% (i.e., a 70% monthly power factor in either direction would have a \$.003 per kWh additional charge). In any month where power factor is both leading and lagging at least 25% of the time, then the Department shall (instead of taking the total kWh netted average) take the lower of the two separate power factor calculations (during lagging and leading times).

**DISCOUNT**

No discounts apply to this schedule.

**BASE RATE ADJUSTMENTS**

The base rates shown above will be adjusted, if any, per long term contract.

**TERMS AND CONDITIONS**

Bills are due and payable as described in long term contract. Service is governed by the “Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts”.

A Renewable Energy charge established by the State Legislature shall be accessed which allows customer’s participation in the Massachusetts Renewable Energy Trust. Current rate level which has remained unchanged since January 1, 2003 is shown. This rate is subject to change based upon approval by the State Legislature.

Filed November 10, 2022

Effective January 1, 2023

**CARBON-FREE ELECTRIC PROGRAM**  
**RATE SCHEDULE**

**AVAILABILITY**

Service under this rate schedule is available for all commercial and industrial electric customers served by the Holyoke Gas and Electric Department (“Department”) who want 100% of their electricity to come from carbon-free energy sources and have chosen to participate (opt-in) in the “Carbon-Free Electric” Program (“Program”). This rate schedule is an additional charge to the customer’s applicable service rate.

**RATE APPLIED MONTHLY**

Carbon Free Electric Rate = All kWh \* (1- Department Carbon-Free % Adj.) \* Carbon-Free Electric Rate Adj.

**CARBON-FREE ELECTRIC RATE ADJUSTMENT**

For customers electing to purchase all of their electric energy from 100% carbon-free sources, the cost per kWh for all electric consumption will be adjusted to the power costs resulting from the purchase of Renewable Energy Certificates (“RECs”) and retirement of such RECs for all customers that opt-in to the Program. The Carbon-Free Electric Adjustment will be set annually based on current REC Market pricing and may be adjusted from time to time to adjust for market fluctuations.

**DEPARTMENT CARBON-FREE ELECTRIC PERCENTAGE ADJUSTMENT**

The Department’s carbon-free percentage of electric retail sales will be set annually based on the retention of all clean energy credits (i.e. RECs, Emission free energy certificates or other evidential non-carbon emitting documentation) produced from HG&E’s fleet of non-carbon producing resources as defined in the MA Climate Bill and that were classified as retired in the Department’s NEPOOL Generation Information System (GIS) account. This may be adjusted from time to time to adjust for Department load and generation fluctuations.

**DISCOUNT**

No discount applies to Carbon-Free Connect rate schedule.

**TERMS AND CONDITIONS**

This Carbon Free Electric rate is in addition to customer’s existing electric service tariff charges. The Department may terminate the voluntary purchase of RECs at any time. The Department can bring this program to an end by giving 30-day written notice to all active participants. Customers can opt-out of the Program at any time. Customers can elect to discontinue their participation by providing written notice to the Department. Bills are due and payable 30 days after date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."

Filed: January 26, 2023

Effective: February 10, 2023

**COMMERCIAL AND INDUSTRIAL ELECTRIC VEHICLE RATE**

**AVAILABILITY**

Service under this schedule is available for electric vehicle (EV) charging stations which are 1) publicly available and which may include public on-street parking spaces, public parking spaces in lots, or public parking garages, 2) publicly available and located on privately owned existing or new commercial or industrial property, and 3) non-public EV stations located on privately owned existing or new commercial and industrial property for the purposes of charging employee fleet or company EVs.

Service under this rate schedule shall be separately metered and is available only to the load of an EV charging station approved by the Department.

**TIME-OF-USE (TOU) RATE**

**Charges – Monthly**

**Customer** \$7.40 per meter

	<b>Peak (\$/kWh)</b>			<b>Off-Peak (\$/kWh)</b>		
	<u>Utilization Level 1 (Less than 10% LF)</u>	<u>Utilization Level 2 (10% LF to 29.99% LF)</u>	<u>Utilization Level 3 (30% LF or Greater)</u>	<u>Utilization Level 1 (Less than 10% LF)</u>	<u>Utilization Level 2 (10% LF to 29.99% LF)</u>	<u>Utilization Level 3 (30% LF or Greater)</u>
<b>Energy</b>	0.07384	0.07384	0.07384	0.06421	0.06421	0.06421
<b>Energy Other</b>	0.08090	0.05680	0.02780	0.00000	0.00000	0.00000
<b>Distribution</b>	0.05152	0.05152	0.05152	0.05152	0.05152	0.05152
<b>Transmission</b>	0.19394	0.13625	0.06653	0.01285	0.01285	0.01285
<b>Renewable Energy</b>	0.00050	0.00050	0.00050	0.00050	0.00050	0.00050
<b>Total Rate</b>	0.40070	0.31894	0.22015	0.12908	0.12908	0.12908

**TIME PERIOD**

The times of the year and times of day are defined as follows:

<b>TOU Period</b>	<b>Times</b>	<b>Days</b>
Peak	Noon to 8:00 p.m.	Daily including weekends and holidays all year
Off-Peak	8:00 p.m. to Noon	Daily including weekends and holidays all year

**UTILIZATION LEVEL**

Load Factor (LF) is the calculation that will be used to measure the utilization level of the EV charging station/charger. It is calculated by taking the total electricity used in the month, divided by the highest monthly peak 15-minute demand (kW) multiplied by the number of days in the billing cycle and the total hours in a day. Initially, all customers will be billed at the Utilization Level 1 rates until demonstration of consistent LF for a six (6) month period, at which time customer rates will be adjusted to the appropriate utilization level.

**RENEWABLE ENERGY CHARGE**

A Renewable Energy charge established by the State Legislature shall be accessed which allows customer's participation in the Massachusetts Renewable Energy Trust. The current rate level, which has remained unchanged since January 1, 2003, is shown. This rate is subject to change based upon approval by the State Legislature and is not subject to any discounts.

**DISCOUNT**

A discount of 10% will be allowed on current gross bills provided the bill, including any arrearage, is paid in full within fifteen (15) days of date of bill.

**RATE ADJUSTMENTS**

The rates shown above will be adjusted periodically due to the cost of services and energy provided.

**TERMS AND CONDITIONS**

This rate is subject to termination at any time upon notice to the Department. Bills are due and payable 30 days after the date of billing. Service is governed by the "Rules and Regulations of the Holyoke Gas & Electric Department, City of Holyoke, Massachusetts."
